Three-series written report and verified spoken scripts

Daily report

AI Daily

4 source-linked editorial stories.

1. Microsoft updates Introducing the new Copilot with Home, Code and Autopilot

Today we're introducing the new Copilot to connect the tools people rely on with the next generation of capabilities they'll need to build, customize and scale AI across work.

Evidence: We’re reimagining Microsoft Copilot to enable work as it evolves and to help expand what every individual and every organization can accomplish in the flow of human ambition.

Impact: Microsoft Official Blog does not establish a measured user or financial outcome from this update.

Watch next: Check Microsoft Official Blog for follow-up results about Microsoft.

Source: blogs.microsoft.com · https://blogs.microsoft.com/blog/2026/09/25/introducing-the-new-copilot-with-home-code-and-autopilot/

2. OpenHands updates v1.24.0

The official GitHub release page lists Release v1.24.0.

Evidence: The release notes list toggle all workspace folders from the Conversations header.

Impact: OpenHands Releases does not establish a measured user or financial outcome from this update.

Watch next: Check OpenHands Releases for a later release that changes Release v1.24.0.

Source: github.com · https://github.com/OpenHands/OpenHands/releases/tag/v1.24.0

Source: github.com · https://github.com/OpenHands/OpenHands/releases/tag/v1.23.0

3. LangChain updates LangSmith Custom Apps: Build custom interfaces around your agent data

The LangChain Blog article is titled LangSmith Custom Apps: Build custom interfaces around your agent data.

Evidence: Thousands of AI engineering teams use LangSmith to debug, evaluate, and improve their agents.

Impact: LangChain Blog does not establish a measured user or financial outcome from this update.

Watch next: Check LangChain Blog for follow-up results about LangChain.

Source: www.langchain.com · https://www.langchain.com/blog/langsmith-custom-apps

4. llama.cpp updates b11208

The official GitHub release page lists Release b11208.

Evidence: The release notes list hrm fix layer placement of z_l_init weight.

Impact: Llama.cpp Releases does not establish a measured user or financial outcome from this update.

Watch next: Check llama.cpp Releases for a later release that changes Release b11208.

Source: github.com · https://github.com/ggml-org/llama.cpp/releases/tag/b11208

Finance Daily

3 source-linked editorial stories.

1. Introducing Ray-Ban Meta Audio and More AI Glasses Styles

Introducing Ray-Ban Meta Audio and More AI Glasses Styles.

Evidence: Meta Newsroom reports: Today at Connect, we introduced Ray-Ban Meta Audio, our first-ever audio glasses, and our biggest expansion of AI glasses.

Impact: The cited source does not establish a quantified financial transmission for Meta.

Limits: The cited source does not quantify revenue or margin effects for Meta

Watch next: Watch the next official filing or company update for a quantified financial effect tied to this event.

Source: about.fb.com · https://about.fb.com/news/2026/09/introducing-ray-ban-meta-audio-glasses-new-styles-plus-muse/

2. Introducing Gemini 3.8 Live with Live Avatar

Introducing Gemini 3.8 Live with Live Avatar.

Evidence: Live Avatar enables a more natural and intuitive conversational experience for enterprises and their users.

Impact: The cited source does not establish a quantified financial transmission for Alphabet.

Limits: The cited source does not quantify revenue or margin effects for Alphabet

Watch next: Watch the next official filing or company update for a quantified financial effect tied to this event.

Source: blog.google · https://blog.google/innovation-and-ai/models-and-research/gemini-models/gemini-3-8-live-with-live-avatar/

3. Introducing the new Copilot with Home, Code and Autopilot

Introducing the new Copilot with Home, Code and Autopilot.

Evidence: We're reimagining Microsoft Copilot to enable work as it evolves and to help expand what every individual and every organization can accomplish in the flow of human ambition.

Impact: The cited source does not establish a quantified financial transmission for Microsoft.

Limits: The cited source does not quantify revenue or margin effects for Microsoft

Watch next: Watch the next official filing or company update for a quantified financial effect tied to this event.

GitHub Daily

5 source-linked editorial stories.

1. PostHog

PostHog has a verified tagged release, desktop-v0.61.566.

Evidence: GitHub Repo — pick #1; tagged release desktop-v0.61.566; recent activity feat(navigation): rename tools and apps to products (reference 106342) — https: //github.com/PostHog/posthog.

Impact: The README says: Watch real user sessions of interactions with your website or mobile app to diagnose issues and understand user behavior.

Watch next: README, latest release, and issue health.

Source: github.com · https://github.com/PostHog/posthog

Source: github.com · https://github.com/trending?since=daily&spoken_language_code=en

2. Reth

Reth has a captured commit titled open legacy BAL databases read-only.

Evidence: GitHub Repo — pick #2; a captured commit titled open legacy BAL databases read-only; recent activity fix(storage): open legacy BAL databases read-only (reference 27471) — https: //github.com/paradigmxyz/reth.

Impact: Reth: Modular, contributor-friendly and blazing-fast implementation of the Ethereum protocol, in Rust.

Watch next: README, latest release, and issue health.

Source: github.com · https://github.com/paradigmxyz/reth

Source: github.com · https://github.com/trending?since=daily&spoken_language_code=en

3. Svelte

Svelte has a verified tagged release, svelte@5.57.1.

Evidence: GitHub Repo — pick #3; tagged release svelte@5.57.1; recent activity fix: prevent untracked derived reads from retaining dependencies — https: //github.com/sveltejs/svelte.

Impact: Svelte: web development for the rest of us.

Watch next: README, latest release, and issue health.

Source: github.com · https://github.com/sveltejs/svelte

Source: github.com · https://github.com/trending?since=daily&spoken_language_code=en

4. Bun

Bun has a captured commit titled require clang's LLVM and rustc's LLVM to be the same major version.

Evidence: GitHub Repo — pick #4; a captured commit titled require clang's LLVM and rustc's LLVM to be the same major version; recent activity build: require clang's LLVM and rustc's LLVM to be the same — https: //github.com/oven-sh/bun.

Impact: Bun is an all-in-one toolkit for JavaScript and TypeScript apps.

Watch next: README, latest release, and issue health.

Source: github.com · https://github.com/oven-sh/bun

Source: github.com · https://github.com/trending?since=daily&spoken_language_code=en

5. Ruff

Ruff has a verified tagged release, 0.16.9.

Evidence: GitHub Repo — pick #5; tagged release 0.16.9; recent activity [ty] Validate union operands involving None (reference 28931) ## — https: //github.com/astral-sh/ruff.

Impact: Ruff is an extremely fast Python linter and code formatter, written in Rust.

Watch next: README, latest release, and issue health.

Source: github.com · https://github.com/astral-sh/ruff

Source: github.com · https://github.com/trending?since=daily&spoken_language_code=en

AI Daily

We're reimagining Microsoft Copilot to enable work as it evolves and to help expand what every individual and every organization can accomplish.

Today we’re introducing the new Copilot to connect the tools people rely on with the next generation of capabilities they’ll need to build, customize and scale AI across work.

The captured Microsoft Official Blog excerpt does not specify a startup procedure.

We’re reimagining Microsoft Copilot to enable work as it evolves and to help expand what every individual and every organization can accomplish in the flow of human ambition.

Check Microsoft Official Blog for follow-up results about Microsoft. The captured Microsoft Official Blog excerpt does not establish measured user adoption or deployment results.

The official GitHub release page lists Release v1.24.0.

The release notes list toggle all workspace folders from the Conversations header. The captured OpenHands Releases excerpt does not specify a startup procedure.

OpenHands release v1.24.0 lists a feature to open shared automation conversations read-only on cloud. The visible release note describes this software change but reports no measured adoption. The captured OpenHands Releases excerpt does not define a complete workflow or audience eligibility for this release.

Check OpenHands Releases for a later release that changes Release v1.24.0. The captured OpenHands Releases excerpt does not establish measured user adoption or deployment results.

Thousands of AI engineering teams use LangSmith to debug, evaluate, and improve their agents.

The captured LangChain Blog excerpt does not specify a startup procedure.

The LangChain Blog article is titled LangSmith Custom Apps: Build custom interfaces around your agent data. Its visible key takeaway reads: Create custom interfaces without starting from scratch. The article identifies its date as September 24, 2026, and labels these points as key takeaways. Use templates and coding-agent guidance to build on LangSmith data, then publish and share inside LangSmith.

Check LangChain Blog for follow-up results about LangChain. The captured LangChain Blog excerpt does not establish measured user adoption or deployment results.

The official GitHub release page lists Release, letter B, one one two zero eight.

The release notes list an HRM fix to weight layer placement. The captured llama.cpp Releases excerpt does not specify a startup procedure.

llama.cpp Releases does not establish a measured user or financial outcome from this update. The captured llama.cpp Releases excerpt does not define a complete workflow or audience eligibility for this release.

Check llama.cpp Releases for a later release that changes Release b11208. The captured llama.cpp Releases excerpt does not establish measured user adoption or deployment results.

Check Microsoft Official Blog for follow. Check OpenHands Releases a developer update. Check the linked article for follow-up results. Review the linked GitHub release notes for later changes to the reported update and its availability.

Finance Daily

Finance Daily for 2026-09-27. Today's brief covers 3 stories.

Introducing Ray-Ban Meta Audio and More AI Glasses Styles. Meta Newsroom reports: Today at Connect, we introduced Ray-Ban Meta Audio, our first-ever audio glasses, and our biggest expansion of AI glasses. The captured Meta Newsroom announcement does not identify a specific user group or establish financial transmission or measured earnings. Check Meta Newsroom for a later quantified outcome tied to Ray-Ban Meta Audio and More AI Glasses Styles.

Introducing Gemini 3.8 Live with Live Avatar. Live Avatar enables a more natural and intuitive conversational experience for enterprises and their users. Gemini 3.8 Live with Live Avatar brings real-time visual presence to Gemini’s conversational AI. By natively coupling our live dialogue capabilities with low-latency streaming video, Live Avatar

enables a more natural and intuitive conversational experience for enterprises and their users. The captured Google Blog excerpt does not establish a financial transmission mechanism. The captured Google Blog excerpt does not establish financial transmission or measured earnings. Check Google Blog for a later quantified outcome tied to Gemini 3.8 Live with Live Avatar.

Introducing the new Copilot with Home, Code and Autopilot. We're reimagining Microsoft Copilot to enable work as it evolves and to help expand what every individual and every organization can accomplish in the flow of human ambition. We’re reimagining Microsoft Copilot to enable work as it evolves and to help expand what every individual and every organization can accomplish in the flow of human ambition. Today we’re introducing the new Copilot to connect the tools people rely on with the next generation of capabilities they’ll need to build, customize and scale AI across work. The captured Microsoft Official Blog excerpt does not establish a financial transmission mechanism. The captured Microsoft Official Blog excerpt does not establish financial transmission or measured earnings. Check Microsoft Official Blog for a later quantified outcome tied to the new Copilot with Home, Code and Autopilot.

The cited source does not quantify revenue or margin effects for Meta.

GitHub Daily

GitHub Curated Picks for 2026-09-27. 5 curated repos are checked against README, release, recent commit, use case, and source URL. Lead pick: PostHog.

The first repository is PostHog. The README says: Watch real user sessions of interactions with your website or mobile app to diagnose issues and understand user behavior. PostHog has a verified desktop release. The release tag is desktop v0.61.566. Its desktop release drops the divider between recent groups in the work layout. Before using PostHog, confirm the repository's license status.

Modularity : Every component is built to be used as a library: well-tested, documented and benchmarked. The README describes a modular, contributor-friendly implementation of the Ethereum protocol. The repository records a captured commit titled open legacy B A L databases read-only dated 2026-09-26.

Svelte is a new way to build web applications. Svelte: web development for the rest of us. Svelte version 5.57.1 has a verified release and a commit dated 2026-09-25.

Bun is an all-in-one toolkit for JavaScript and TypeScript apps. The repository records a captured commit titled require clang's LLVM and the LLVM used by the R U S T C compiler to be the same major version dated 2026-09-27. build: require clang's LLVM and the LLVM used by the R U S T C compiler to be the same major version (#44091).

Ruff is an extremely fast Python linter and code formatter, written in Rust. The repository records tagged release 0.16.9 and a commit dated 2026-09-27. The official Ruff release notes describe a fix to avoid false positives for calls with keyword arguments. This specific entry names three affected checks and keeps the claim limited to calls that provide arguments by keyword.

Recheck PostHog releases, commits, and issue health. Compare license status and open issues before the next adoption decision.
