Three-series written report and verified spoken scripts

Daily report

AI Daily

4 source-linked editorial stories.

1. Add Runtime Controls to AI Agents with NVIDIA OpenShell

NVIDIA OpenShell is an open source runtime that controls which systems and data an AI agent can access.

Evidence: The runtime combines sandboxed execution, controlled service access, credential management, and formal policy analysis to restrict API operations and protect credentials outside the agent workload.

Impact: Organizations including Cadence, Slack, and Gecko Robotics are adopting OpenShell for chip design, enterprise automation, and physical robotics governance.

Watch next: Watch OpenShell 0.1.0 release notes for sandbox policy changes and deployment examples.

2. Cloudflare's 2026 Annual Founders' Letter

The Internet is changing more today than at any point since Cloudflare launched back on September 27, 2010.

Evidence: Some of it is upending the way we think the Internet works.

Impact: Teams can evaluate the documented Cloudflare workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.cloudflare.com · https://blog.cloudflare.com/cloudflares-2026-annual-founders-letter/

3. Holo4: powering generalist computer-use agents

Holo4 is a new series of agentic models.

Evidence: It comes in two sizes: 27B dense and 35B-A3B Mixture of Experts.

Impact: Teams can evaluate the documented Hugging Face workflow before wider rollout.

Watch next: Watch the Hugging Face release for patch notes and rollout issues.

Source: huggingface.co · https://huggingface.co/blog/Hcompany/holo4

4. Vercel: Ember-1 from Fireworks now available on AI Gateway

The Vercel changelog says Ember-1 from Fireworks now available on AI Gateway.

Evidence: For coding agents that make repeated model calls, shorter reasoning traces can reduce output costs and the amount of context carried into later steps.

Impact: Teams can evaluate the documented Vercel workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Finance Daily

1 source-linked editorial stories.

1. NVIDIA Announces a $150 Billion Share Repurchase Authorization Increase

NVIDIA Announces a $150 Billion Share Repurchase Authorization Increase.

Evidence: The company expects to execute the total remaining program through fiscal year 2028.

Impact: The cited source does not establish a quantified financial transmission for NVIDIA.

Limits: Check the next official update for a quantified financial effect

Watch next: Watch the next official filing or company update for a quantified financial effect tied to this event.

GitHub Daily

4 source-linked editorial stories.

1. Joplin

Joplin has a verified tagged release, v3.7.21.

Evidence: GitHub Repo — pick #1; tagged release v3.7.21; recent activity Update dependency @playwright/test to v1.60.0 (reference 16665) — https: //github.com/laurent22/joplin.

Impact: Joplin: Joplin - the privacy-focused note taking app with sync capabilities for Windows, macOS, Linux, Android and iOS.

Watch next: README, latest release, and issue health.

Source: github.com · https://github.com/laurent22/joplin

2. Bun

Bun has a captured commit titled require clang's LLVM and rustc's LLVM to be the same major version.

Evidence: GitHub Repo — pick #2; a captured commit titled require clang's LLVM and rustc's LLVM to be the same major version; recent activity build: require clang's LLVM and rustc's LLVM to be the same — https: //github.com/oven-sh/bun.

Impact: Bun is an all-in-one toolkit for JavaScript and TypeScript apps.

Watch next: README, latest release, and issue health.

Source: github.com · https://github.com/oven-sh/bun

Source: github.com · https://github.com/trending?since=daily&spoken_language_code=en

3. Unciv

Unciv has a verified tagged release, 4.22.4.

Evidence: GitHub Repo — pick #3; tagged release 4.22.4; recent activity Pushed 2026-09-27 — https: //github.com/yairm210/Unciv.

Impact: Unciv: Open-source Android/Desktop remake of Civ V.

Watch next: README, latest release, and issue health.

Source: github.com · https://github.com/yairm210/Unciv

Source: github.com · https://github.com/trending?since=daily&spoken_language_code=en

4. Mullvadvpn App

Mullvadvpn App has a verified tagged release, android/2026.11.

Evidence: GitHub Repo — pick #4; tagged release android/2026.11; recent activity Recent commit verified — https: //github.com/mullvad/mullvadvpn-app.

Impact: Mullvadvpn App is the Mullvad VPN client app for desktop and mobile.

Watch next: README, latest release, and issue health.

AI Daily

This is AI Daily. Today's briefing covers 4 verified stories from original announcements and release notes.

NVIDIA OpenShell is an open source runtime that controls which systems and data an AI agent can access.

Organizations including Cadence, Slack, and Gecko Robotics are adopting OpenShell for chip design, enterprise automation, and physical robotics governance.

The runtime combines sandboxed execution, controlled service access, credential management, and formal policy analysis to restrict API operations and protect credentials outside the agent workload.

The Internet is changing more today than at any point since Cloudflare launched back on September 27, 2010.

Cloudflare says change involves disruption. In its annual letter, the company identifies the web's rate of growth as one significant change, while remaining optimistic about what lies ahead.

Holo4 is a new series of agentic models. The company says the models are for generalist agents that use computers.

It comes in two sizes: 27B dense and 35B-A3B Mixture of Experts.

The Vercel changelog says Ember-1 from Fireworks now available on AI Gateway.

The official changelog says shorter reasoning traces can reduce output costs when coding agents make repeated model calls. It says the same traces can also reduce how much context the agent carries to later steps.

Watch OpenShell 0.1.0 release notes for sandbox policy changes and deployment examples.

Finance Daily

Finance Daily for 2026-09-28. Today's brief covers 1 story.

NVIDIA’s Board of Directors has authorized a $150 billion increase to the share repurchase program, raising the remaining total program to $235 billion. The company expects to execute the total remaining program through fiscal year 2028. The larger authorization increases NVIDIA's capacity for future share repurchases.

Watch NVIDIA's fiscal 2028 filings for actual repurchases under the authorization.

GitHub Daily

GitHub Curated Picks for 2026-09-28. Lead pick: Joplin.

The first repository is Joplin. Joplin - the privacy-focused note taking app with sync capabilities for Windows, macOS, Linux, Android and iOS. Joplin version 3.7.21 adds a setting to hide the AI Chat toolbar button. Before using Joplin, confirm the repository's license status.

Bun is an all-in-one toolkit for JavaScript and TypeScript apps. The repository records a captured commit titled require clang's LLVM and the LLVM used by the R U S T C compiler to be the same major version dated 2026-09-27. The Bun

commit requires Clang and Rust to use the same major LLVM version. This is a build requirement recorded in Bun's GitHub commit.

Unciv is an open source strategy game for Android and desktop computers. The official GitHub release notes for version 4.22.4 say the Linux launcher now has a log option. That option enables logs from the release build.

This is the VPN client software for the Mullvad VPN service. The Mullvad VPN client for desktop and mobile has an official Android release labeled version 2026.11. The official GitHub release page for Mullvad VPN Android is labeled version 2026.11. It lists a fix for a rare crash. The release note says the crash could occur when the app received a touch input just as it created the map view.

Recheck Joplin releases, commits, and issue health. Compare license status and open issues before the next adoption decision.
