1. Claude Code publishes v2.1.289

Claude Code v2.1.289 fixes a deny or ask rule on managed machines.

Evidence: Fixed a deny or ask rule on a nested part of a compound shell command not holding over a user-installed mod's approval on managed machines.

Impact: Teams can evaluate the documented Claude Code workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

3 source-linked editorial stories.

1. CoreWeave announces NVIDIA Vera Rubin cloud availability

CoreWeave announces NVIDIA Vera Rubin cloud availability.

Evidence: NVIDIA Blog reports: In its early tests, Cognition saw Vera Rubin NVL72 deliver up to a 4.8x increase in total token throughput for SWE-2 inference workloads over GB200 NVL72.

Impact: Cognition runs training, reinforcement learning and production inference for Devin on CoreWeave.

Limits: The reported early benchmark is attributed to Cognition; it is not an independently reproduced market-wide performance result

Watch next: Read the next official company release for availability and adoption.

2. Federal Reserve changes stress capital buffer calculation from 2028

Federal Reserve changes stress capital buffer calculation from 2028.

Evidence: Federal Reserve Board reports: The Board will begin averaging stress capital buffer requirements in 2028 to ensure that only models incorporating public input are used in the calculation.

Impact: Together, the changes are likely to reduce year-over-year volatility in capital requirements by approximately 50 percent and are not expected to materially affect aggregate capital requirements.

Limits: The approximately 50 percent change concerns expected year-over-year volatility, not a 50 percent cut in total bank capital

Watch next: Read the next official Federal Reserve policy update.

3. NVIDIA announces DGX Spark 64GB for October 23

NVIDIA announces DGX Spark 64GB for October 23.

Evidence: NVIDIA Blog reports: $4,999 starting price for the 64GB configuration.

Impact: The announcement names Acer, ASUS, Dell, Gigabyte, HP and MSI as the manufacturer partners offering the configuration.

Limits: October 23 is the announced availability date; the release does not report sales for this configuration

Watch next: Read the next official company release for availability and adoption.

GitHub Daily

4 source-linked editorial stories.

1. Onnxruntime

Onnxruntime has a captured commit titled Add external Dawn API package CI coverage for the WebGPU plugin.

Evidence: GitHub Repo — pick #1; a captured commit titled Add external Dawn API package CI coverage for the WebGPU plugin; recent activity Add external Dawn API package CI coverage for the WebGPU plugin — https: //github.com/microsoft/onnxruntime.

Impact: Onnxruntime: ONNX Runtime: cross-platform, high performance ML inferencing and training accelerator.

Watch next: README, latest release, and issue health.

Source: github.com · https://github.com/microsoft/onnxruntime

Finance Daily

Finance Daily for 2026-10-04. Verified developments and the next facts to watch.

Originally published 2026-09-30; weekend review: NVIDIA Blog reports: CoreWeave announces NVIDIA Vera Rubin cloud availability. In its early tests, Cognition saw Vera Rubin NVL72 deliver up to a 4.8x increase in total token throughput for SWE-2 inference workloads over GB200 NVL72. CoreWeave announced availability of NVIDIA Vera Rubin NVL72 on CoreWeave Cloud, making it one of the first cloud providers to deliver the platform in customers' hands.

Originally published 2026-09-30; weekend review: Federal Reserve Board reports: Federal Reserve changes stress capital buffer calculation from 2028. requires the Board, when calculating stress capital buffer requirements, to average the results from the two most recent annual supervisory stress tests for firms subject to the stress test in both years. The Board will begin averaging stress capital buffer requirements in 2028 to ensure that only models incorporating public input are used in the calculation. The proposal would request public comment on a revision to the Board's noninterest income model that would improve the stress test's ability to capture business model diversity across firms. If adopted, these adjustments would replace the current noninterest income model that projects each bank's fee income under stress. Comments are due 60 days after publication in the Federal Register . Together, the changes are likely to reduce year-over-year volatility in capital requirements by approximately 50 percent and are not expected to materially affect aggregate capital requirements.

Originally published 2026-10-02; weekend review: NVIDIA Blog reports: NVIDIA announces DGX Spark 64GB for October 23. DGX Spark 64GB is available from Acer, ASUS, Dell, Gigabyte, HP and MSI on Friday, Oct. 23, starting at $4,999.

Read the next official company release for availability and adoption. The reported early benchmark is attributed to Cognition; it is not an independently reproduced market-wide performance result.

GitHub Daily

GitHub Curated Picks for 2026-10-04. Lead pick: Onnxruntime.

O N N X Runtime is a cross-platform inference and training machine-learning accelerator. The repository records a captured commit titled Add external Dawn API package CI coverage for the WebGPU plugin dated 2026-10-04.

We're building the features of Firebase using enterprise-grade open source tools. Supabase is the Postgres development platform. Supabase gives you a dedicated Postgres database to build your web, mobile, and AI applications. The repository records a captured commit titled show compute waitlist notice when project is not enrolled dated 2026-10-03. Before using Supabase, confirm the repository's license status.

Libraries that are used to help make your application more secure. Awesome Go is a curated list of awesome Go frameworks, libraries and software. The repository records a captured commit titled Add gomocker library to testing tools list dated 2026-10-04.

KernelSU is a Kernel based root solution for Android. The repository records a captured commit titled Avoid repeatedly triggering service stage dated 2026-10-04. The GitHub commit for KernelSU is titled: fix kernel: Avoid repeatedly triggering service stage.

Recheck Onnxruntime releases, commits, and issue health. Compare license status and open issues before the next adoption decision.
