Email Bluesky Facebook LinkedIn Reddit Whatsapp X Save article View saved research Illustration: The Project Twins When he wants to scratch an intellectual itch, Ian Gaudet does what people are increasingly doing on the Internet: he asks a chatbot. But when it comes to his research data, Gaudet, a neuroscientist at Florida Atlantic University in Boca Raton, prefers to stay offline. “I do not want Claude to start telling people my research results,” he explains. AI co-scientists are revolutionizing how research is done Cloud-based large language models (LLMs), such as those underlying the chatbots Claude (Anthropic), Gemini (Google) and ChatGPT (OpenAI), represent the cutting edge of artificial-intelligence performance. However, these systems might use what is typed into them for training purposes.
