4 source-linked editorial stories.

### 1. OpenCode Discloses Security Breach, Says Attackers May Have Accessed Users' OpenAI, Anthropic And Google API Keys

OpenCode, the open-source AI coding agent that lets developers plug their own API keys from OpenAI, Anthropic, Google and dozens of other providers into a single terminal-based tool, has disclosed a security breach that it says exposed a subset of its users' provider credentials.

Evidence: If a user did not receive that email, OpenCode says, they were not among those impacted.

Impact: Teams can evaluate the documented Officechai workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

### 2. AI Gateway logs now show session affinity

AI Gateway logs now have a Sessions view that groups requests into sessions and shows how session affinity routed each one.

Evidence: Each row shows the coding agent or app that ran the session, such as Claude Code, Codex, or Cursor, along with its cost, models, providers, and how much of its input was cached across every turn.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

### 3. NVIDIA: RTX Spark Ignites Global Celebration as New Windows PCs Arrive

NVIDIA RTX Spark laptops are now available, bringing NVIDIA Blackwell RTX graphics, up to 128GB of unified memory and the full NVIDIA AI platform to slim, premium Windows PCs.

Evidence: Starting at $2,399, laptops from ASUS, Dell, HP, Lenovo, Microsoft and MSI bring powerful local AI, content creation and gaming capabilities to a portable device, with additional systems on the way.

Impact: Teams can evaluate the documented NVIDIA workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

### 4. OpenAI Python SDK releases 3.35.1

PyPI records openai version 3.35.1, uploaded on 2026-10-18.

Evidence: The package summary is: The official Python library for the openai API.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

### 1. Why hedge funds could be making a bond market shock more likely

Hedge funds' increased presence in global bond markets makes the likelihood of a broader market shock "greater than what it was, " Bank of England deputy governor Sarah Breeden told CNBC Thursday.

Evidence: CNBC Markets reports: Hedge funds' increased presence in global bond markets makes the likelihood of a broader market shock "greater than what it was, " Bank of England deputy governor Sarah Breeden told CNBC Thursday. Breeden — the central bank's deputy governor for financial stability, and a member of its rates-setting Monetary Policy Committee — said the changing mix of bond market investors, and their increased use of leverage, raises the risk of localized market turbulence turning into broader financial stress.

Impact: The sector read is whether Hedge confirms the same setup across Macro rather than staying a single-name headline.

Limits: Why hedge funds could be: firmer rates or sticky inflation could reverse the liquidity and equity-risk read

Watch next: Watch the next official update, market tape, and whether follow-through broadens beyond Hedge.
