Daily report

AI Daily

54 source-linked editorial stories.

1. NVIDIA Nemotron 3.5 Transcribe and Granary v2: Intelligent Multilingual Transcription You Can Prompt and Adapt

NVIDIA Nemotron 3.5 Transcribe is an open-weight, promptable model that turns recorded speech into useful text, now available on Hugging Face and ModelScope.

Evidence: It brings transcription, speaker attribution (diarization), translation, and audio question answering into one checkpoint: it transcribes 40 languages, translates 31 of them to or from English, and attributes speakers in 13.

Impact: Teams can evaluate the documented NVIDIA workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: huggingface.co · https://huggingface.co/blog/nvidia/nemotron-transcribe-granary

2. New Prompt Injection Techniques Cover Agent-Planning Attacks

The CrowdStrike Prompt Injection Taxonomy, built and maintained by CrowdStrike AI security researchers, offers the industry's most comprehensive framework for understanding and defending against the ever-expanding array of attack techniques.

Evidence: Today Crowdstrike is introducing a new version of the taxonomy that adds newly discovered attack techniques on autonomous agents and how they plan.

Impact: Teams can evaluate the documented Crowdstrike workflow before wider rollout.

Watch next: Watch the Crowdstrike release for patch notes and rollout issues.

Source: www.crowdstrike.com · https://www.crowdstrike.com/en-us/blog/new-prompt-injection-techniques-cover-agent-planning-attacks

3. Gemini 4 Carbon: our next frontier model

It shows significant gains across coding and agentic tasks as well as across key capabilities critical for cybersecurity defense, landing a firm lead in SEC-bench Pro (88.2%) for finding vulnerabilities, ExploitGym (54.8%) for exploitation, and CWE-bench (71.0%) for patching.

Evidence: On internal benchmarks, Carbon drives a strong uplift in generating secure code, and in live coding environments with our own teams it shows reduced misalignment and fabrication rates.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: blog.google · https://blog.google/innovation-and-ai/models-and-research/gemini-models/introducing-gemini-4-carbon

Source: x.com · https://x.com/GoogleDeepMind/status/2115489356437651654

4. GitHub Agentic Workflows generally available

GitHub Agentic Workflows, an open source project from GitHub Next, is now generally available.

Evidence: With agentic workflows, you can automate reasoning-based tasks like issue triage, CI failure analysis, documentation updates, and test writing by using coding agents inside GitHub Actions.

Impact: Teams can evaluate the documented Github workflow before wider rollout.

Watch next: Watch the Github release for patch notes and rollout issues.

Source: github.blog · https://github.blog/changelog/2026-10-28-github-agentic-workflows-generally-available

Source: github.github.com · https://github.github.com/gh-aw/setup/quick-start/?utm_source=agentic-workflows-changelog-quickstart&utm_medium=changelog&utm_campaign=universe-2026/

5. Build and manage Connected Apps in one place

Build and manage Connected Apps in one place.

Evidence: The Reference discovery page documents the Google update.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/innovation-and-ai/technology/developers-tools/connected-apps-one-place

6. NVIDIA RTX Spark Windows Laptops Gain New Models, Agent Tools and Games

NVIDIA RTX Spark powers thin and light laptops built for everything that developers, creators and gamers do.

Evidence: RTX Spark laptops are now available from ASUS, Dell, HP, Lenovo, Microsoft and MSI.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: blogs.nvidia.com · https://blogs.nvidia.com/blog/local-ai-rtx-spark-laptops-updates-models-agents-games/

7. GitHub Copilot app, Universe releases

Work doesn't always fit in a single repository or session.

Evidence: The GitHub Changelog page documents the GitHub Copilot update.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.blog · https://github.blog/changelog/2026-10-28-github-copilot-app-universe-releases

8. Route and orchestrate models with GitHub Copilot Fusion

Copilot Fusion brings together Project HydraFusion's multi-model orchestration and Copilot auto model selection's fine-tuned model selection, leveraging the benefits of both to balance performance and cost efficiency. Since Project HydraFusion launched, we've improved its performance.

Evidence: Since Project HydraFusion launched, we’ve improved its performance.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: github.blog · https://github.blog/changelog/2026-10-28-route-and-orchestrate-models-with-github-copilot-fusion

9. OpenAI and ServiceNow expand partnership across enterprise workflows

The expansion builds on its partnership announced in January, bringing OpenAI into more of the work ServiceNow does for its customers and within its own business.

Evidence: The OpenAI News page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: Watch the OpenAI release for patch notes and rollout issues.

Source: openai.com · https://openai.com/index/openai-servicenow-partnership-expansion

10. OpenAI: Starting today, eligible ChatGPT Pro and Business subscribers can claim up to $500 per month in API credits to build apps and agent...

Starting today, eligible ChatGPT Pro and Business subscribers can claim up to $500 per month in API credits to build apps and agents.

Evidence: The X @OpenAIDevs page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: x.com · https://x.com/OpenAIDevs/status/2115583698074755078

Source: help.openai.com · https://help.openai.com/en/articles/20001626-api-credits-benefit-for-eligible-chatgpt-subscriptions

11. Diffuspace publishes Clover-35B-A3B-Preview-GGUF model repository

Diffuspace publishes Clover-35B-A3B-Preview-GGUF model repository.

Evidence: The Hugging Face release records Preview for Diffuspace.

Impact: Teams can evaluate the documented Diffuspace workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: huggingface.co · https://huggingface.co/Diffuspace/Clover-35B-A3B-Preview-GGUF

Source: diffuspace.ai · https://diffuspace.ai/blog/clover-35b/

12. Introducing the Microsoft Copilot harness in Foundry Agent Service

Today, we're introducing the Microsoft Copilot harness in Foundry Agent Service in public preview.

Evidence: It gives developers a fully managed way to build agents that reason, use tools, and complete complex, long-running tasks.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: Watch the Microsoft release for patch notes and rollout issues.

Source: devblogs.microsoft.com · https://devblogs.microsoft.com/foundry/microsoft-copilot-harness-in-foundry/

13. Mistral AI: Today, were introducing the Responses API in public preview, made for building agents on Mistral.

Today, Mistral AI is introducing the Responses API in public preview, made for building agents on Mistral.

Evidence: Each response returns the model’s answer, its reasoning and its tool calls as separate items, so your app can handle every step more easily than with Chat Completions.

Impact: Teams can evaluate the documented Mistral AI workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: x.com · https://x.com/MistralAI/status/2115443720371814478

14. Repository plugin defaults and enterprise plugin controls generally available

Repository plugin defaults and enterprise-managed plugin controls are now generally available in VS Code, Copilot CLI, and the GitHub Copilot app.

Evidence: Enterprises can require plugins, block plugins, and restrict installation to approved marketplaces.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.blog · https://github.blog/changelog/2026-10-28-repository-plugin-defaults-and-enterprise-plugin-controls-generally-available

15. Win the Agentic Era, Together: Introducing the Docker Navigator Partner Program

Docker is launching the Navigator Partner Program, with three tiers, co-selling benefits, and a new incentive for every registered AI governance deal.

Evidence: The Docker Blog page documents the Docker update.

Impact: Teams can evaluate the documented Docker workflow before wider rollout.

Watch next: Watch the Docker release for patch notes and rollout issues.

Source: www.docker.com · https://www.docker.com/blog/docker-navigator-partner-program/

16. ViBench 2.0: A Benchmark for Long-Horizon Software Building

ViBench 2.0: A Benchmark for Long-Horizon Software Building.

Evidence: The source records 2.0 / 1.0.

Impact: Teams can evaluate the documented Replit workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: replit.com · https://replit.com/blog/vibench-2-long-horizon-software-benchmark

17. Advancing morphological profiling with self-supervised learning through comparative insights into representation learning of cellular perturbations

The Joint Undertaking for Morphological Profiling-Cell Painting (JUMP-CP) consortium represents a notable collaborative effort to standardize and expand the use of cell painting assays 6.

Evidence: This large-scale open-source initiative has generated over 100 TB of data, encompassing millions of high-content images from more than 120,000 chemical and genetic perturbations acquired across 12 pharmaceutical companies and academic institutions (that is, sources).

Impact: Teams can evaluate the documented Nature workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: www.nature.com · https://www.nature.com/articles/s41592-026-03270-z

18. Build shared workflows for your team with Copilot Automations

Shared Copilot Automations are rolling out, enabling teams to build and maintain AI-powered workflows together.

Evidence: The GitHub Changelog page documents the GitHub Copilot update.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: Watch the GitHub Copilot release for patch notes and rollout issues.

Source: github.blog · https://github.blog/changelog/2026-10-28-build-shared-workflows-for-your-team-with-copilot-automations

19. Introducing the Microsoft Copilot harness: Unlocking the potential of truly multi-model agentic work

If you want to compete, you need to be multi-model.

Evidence: The Microsoft Official Blog page documents the Microsoft update.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: blogs.microsoft.com · https://blogs.microsoft.com/blog/2026/10/28/introducing-the-microsoft-copilot-harness-unlocking-the-potential-of-truly-multi-model-agentic-work/

20. Artificial Analysis: We are launching AA-Video-I2V v2.1 and AA-Video-I2V-Silent v2.1, our new benchmark for evaluating image to video model...

Artificial Analysis is launching AA-Video-I2V v2.1 and AA-Video-I2V-Silent v2.1, its new benchmark for evaluating image to video models.

Evidence: The X @ArtificialAnlys release records v2.1 for Artificial Analysis.

Impact: Teams can evaluate the documented Artificial Analysis workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: x.com · https://x.com/ArtificialAnlys/status/2115483562921304316

21. OpenAI Codex documents how banked usage resets work

OpenAI-granted banked reset: A free, one-time reset saved to your account for later use, including resets earned through qualifying referral promotions.

Evidence: Receiving one does not refresh your usage; you choose when to use it before it expires.

Impact: Teams can evaluate the documented Codex workflow before wider rollout.

Watch next: Watch the Codex release for patch notes and rollout issues.

Source: help.openai.com · https://help.openai.com/en/articles/20001498-how-banked-codex-resets-work

22. The accuracy-safety trade-off of large reasoning models in clinical diagnostics

This study finds that reasoning-enabled AI models improve diagnostic accuracy but produce more false positives and less consistent outputs but physician oversight helps retain benefits while reducing safety risks.

Evidence: The Nature Machine Learning page documents the Nature update.

Impact: Teams can evaluate the documented Nature workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: www.nature.com · https://www.nature.com/articles/s41467-026-78520-x

23. Legora is building the agentic operating system for legal work

See how Legora uses OpenAI models, ChatGPT, and Codex to accelerate legal workflows, expand contract analysis, and free lawyers to focus on higher-value work.

Evidence: The OpenAI News page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: Watch the OpenAI release for patch notes and rollout issues.

Source: openai.com · https://openai.com/index/legora

24. OpenAI: Install the OpenAI Developers plugin in ChatGPT or Codex to create an API key and start your first project

OpenAI: Install the OpenAI Developers plugin in ChatGPT or Codex to create an API key and start your first project.

Evidence: The X @ChatGPT page documents the Codex update.

Impact: Teams can evaluate the documented Codex workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: x.com · https://x.com/ChatGPT/status/2115601130558546226

Source: chatgpt.com · https://chatgpt.com/plugins/openai-developers?open_in_app

25. Security extension for the GitHub Copilot app

The security extension is in public preview on github.com and GitHub Enterprise Cloud with data residency.

Evidence: The GitHub Changelog release records public preview for GitHub Copilot.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: watch security notes, rollout controls.

Source: github.blog · https://github.blog/changelog/2026-10-28-security-extension-for-the-github-copilot-app

26. XREAL AURA: Wired XR glasses to watch, work, and play

The first wired XR glasses powered by Android XR bring your apps, your shows, and help from Gemini wherever you go.

Evidence: Orders open today in the U.S. Canada, and Korea, and on November 2 in Japan.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/products-and-platforms/platforms/android/xreal-aura

27. GitHub Copilot in VS Code, Universe releases

Check progress, give direction, or start a new task on your development machine from GitHub Mobile.

Evidence: Your phone provides the controls, and the agent does the work on your development machine.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.blog · https://github.blog/changelog/2026-10-28-github-copilot-in-vs-code-universe-releases

28. GitHub Enterprise now includes access to GitHub Copilot

Enterprises working with a GitHub or Microsoft account team can now get Copilot included with GitHub Enterprise for every licensed user.

Evidence: Previously, you had to manage two things: how many Copilot seats you were paying for and how much AI usage those users consumed.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.blog · https://github.blog/changelog/2026-10-28-github-enterprise-now-includes-access-to-github-copilot

29. Replit's Architecture Behind Secure Agent Work

Last week's security disclosures offered a glimpse of the challenges ahead.

Evidence: AI agents are making vulnerabilities faster and easier to find, while the time from discovery to exploitation continues to shrink.

Impact: Teams can evaluate the documented Replit workflow before wider rollout.

Watch next: Watch the Replit release for patch notes and rollout issues.

Source: replit.com · https://replit.com/blog/architecture-behind-secure-agent-work

30. OpenAI Model Spec

The Model Spec specifies desired behavior for the models underlying OpenAI's products (including its APIs).

Evidence: The Openai (official) page documents the Openai update.

Impact: Teams can evaluate the documented Openai workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: model-spec.openai.com · https://model-spec.openai.com/2026-10-29.html

Source: the-decoder.com · https://the-decoder.com/openai-sets-new-behavioral-guidelines-for-ai-models-that-have-already-proven-hard-to-control/

31. Forced alignment with Cue: Character-level audio timing

Today, ElevenLabs is sharing more on Cue, a forced alignment model that places every character in an audio file on a precise timeline.

Evidence: Cue powers ElevenLabs' Scribe model family, and on real-world recordings, it's more accurate than every aligner ElevenLabs tested, in all 29 languages of the benchmark.

Impact: Teams can evaluate the documented Elevenlabs workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: elevenlabs.io · https://elevenlabs.io/blog/cue-aligner

32. Introducing AnySpeechRecognizer and AnyDecisionModel: Open Models for Speech and Decisions on Apple Platforms

With AnyLanguageModel and swift-huggingface now on their 1.x releases, we're extending the same approach to speech and decisions: familiar Swift APIs with a choice of model.

Evidence: Today we're announcing two packages: AnySpeechRecognizer implements Apple's new speech-to-text API with a choice of recognition engine, including NVIDIA's Parakeet and Alibaba's Qwen3-ASR running locally on Core ML, and adds speaker diarization to track who speaks when.

Impact: Say a customer calls your support line.

Watch next: watch license, setup path, and benchmark.

Source: huggingface.co · https://huggingface.co/blog/anydecisionmodel

33. Microsoft: The GitHub Copilot app now supports Projects to manage work across multiple repos and tools in one place.

The GitHub Copilot app now supports Projects to manage work across multiple repos and tools in one place. Copilot coordinates tasks using context from repos, design files, Slack, and notes.

Evidence: Copilot coordinates tasks using context from repos, design files, Slack, and notes.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/GHchangelog/status/2115477829706023305

Source: github.blog · https://github.blog/changelog/2026-10-28-github-copilot-app-universe-releases

34. Welcome Le Chonk: Mistral Large 4 on Hugging Face

Welcome Le Chonk: Mistral Large 4 on Hugging Face.

Evidence: The Hugging Face Blog release records 1M for Hugging Face.

Impact: Teams can evaluate the documented Hugging Face workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: huggingface.co · https://huggingface.co/blog/mistral-large4

35. Build Generative UI Apps with A2UI & CopilotKit Agents

Build Generative UI Apps with A2UI & CopilotKit Agents.

Evidence: The Google Developers Blog page documents the Google update.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: Watch the Google release for patch notes and rollout issues.

Source: developers.googleblog.com · https://developers.googleblog.com/build-generative-ui-apps-with-a2ui-copilotkit-agents/

36. Credit Saison achieves 954% ROI in a ChatGPT Enterprise pilot

The company also operates financing and international businesses.

Evidence: The OpenAI News page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: openai.com · https://openai.com/index/credit-saison

37. Dive into new topics with immersive explorations in the Gemini app.

The Gemini app now has a library of immersive explorations, giving you an interactive, visual way to explore topics layer-by-layer, from microscopic systems to deep space and more.

Evidence: You can access this library in the Gemini student hub by clicking on "Try immersive explorations" and will soon be able to access these immersive explorations directly in a chat conversation with Gemini.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/innovation-and-ai/products/gemini-app/immersive-explorations-student-hub

38. Tibo (OpenAI): Team is working on this but it's not rolling out just yet, sorry for any confusion.

Team is working on this but it's not rolling out just yet, sorry for any confusion.

Evidence: The X @thsottiaux page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/thsottiaux/status/2115588390414581916

39. Cognition: Founded by three 22-year-olds in 2023, mercor crossed $2B ARR in June, only 4 months after hitting $1B.

Founded by three 22-year-olds in 2023, @mercor crossed $2B ARR in June, only 4 months after hitting $1B.

Evidence: The source records 4 months.

Impact: Teams can evaluate the documented Cognition workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/cognition/status/2115488769306673267

40. ElevenLabs: New from ElevenLabs research: Today were sharing more about Cue, our new forced alignment model.

That means the right words show up at the right time.

Evidence: The X @ElevenLabs page documents the ElevenLabs update.

Impact: Teams can evaluate the documented ElevenLabs workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: x.com · https://x.com/ElevenLabs/status/2115527286065914248

41. GitHub intelligence puts your code, context, and history to work

Agents should understand more than your codebase-they should understand how your team works.

Evidence: The GitHub Changelog page documents the GitHub update.

Impact: Teams can evaluate the documented GitHub workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.blog · https://github.blog/changelog/2026-10-28-github-intelligence-puts-your-code-context-and-history-to-work

42. OpenAI: By popular request, you can now text your dot.

By popular request, you can now text your dot.

Evidence: The X @ChatGPT page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/ChatGPT/status/2115496387613786374

Source: x.com · https://x.com/ChatGPT/status/2115497827845476525

43. Gemini Notebook: This is now available to ALL users on mobile

This is now available to ALL users on mobile Have you used it yet?

Evidence: Powered by its latest audio models, ask questions about your sources and get step-by-step guidance (almost) completely hands-free.

Impact: Teams can evaluate the documented Gemini Notebook workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/Gemini_Notebook/status/2115582082340860324

44. Announcing Project ProtoStar: Making Publicly Funded Science AI-Ready

An initiative bringing together universities, research organizations, industry, and the open science community to make publicly funded research easier to discover, reuse, and build upon.

Evidence: The Hugging Face Blog page documents the Huggingface update.

Impact: Teams can evaluate the documented Huggingface workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: huggingface.co · https://huggingface.co/blog/announcing-project-protostar

45. Meta: Today we're announcing support for university research at Caltech, OhioStateMed, LSU, IndianaUniv, and UTHealthHouston to help advanc...

Today AI at Meta is announcing support for university research at @Caltech, @OhioStateMed, @LSU, @IndianaUniv, and @UTHealthHouston to help advance breakthroughs across science and medicine.

Evidence: The X @AIatMeta page documents the Meta update.

Impact: Teams can evaluate the documented Meta workflow before wider rollout.

Watch next: watch availability, limits, and real usage for Meta.

Source: x.com · https://x.com/AIatMeta/status/2115490919923548307

46. New global AI computing capacity is doubling every 9 months

New global AI computing capacity is doubling every 9 months | Epoch AI Quarterly additions of computing capacity have grown about 2.5× per year since 2024.

Evidence: The source records 2.5 / GPT-4.

Impact: Teams can evaluate the documented Epoch workflow before wider rollout.

Watch next: watch availability, limits, and real usage for Epoch.

Source: epoch.ai · https://epoch.ai/data-insights/ai-computing-capacity-additions-doubling

47. Github: Commands

This document details all commands supported by Qwen Code, helping you efficiently manage sessions, customize the interface, and control its behavior.

Evidence: The GitHub page documents the Github update.

Impact: Teams can evaluate the documented Github workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: qwenlm.github.io · https://qwenlm.github.io/qwen-code-docs/en/users/features/commands

48. Ads in AI Mode expand to new markets.

Ads in AI Mode expand to new markets.

Evidence: The Reference discovery page documents the Google update.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/products/ads-commerce/ads-in-ai-mode-global

Source: drive.tencent.com · https://drive.tencent.com/

49. Applying digital twins to prevent preterm births

One in ten pregnancies involves a preterm birth, usually without warning signs or known risk factors.

Evidence: The Nature Machine Learning page documents the Nature update.

Impact: Teams can evaluate the documented Nature workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: www.nature.com · https://www.nature.com/articles/d41591-026-00056-w

50. Chrome's enhanced autofill helps you fill out forms with suggestions pulled from Gmail.

As always, sensitive data is encrypted and you remain in control.

Evidence: You can manage whether enhanced autofill is enabled and what it can access via your Chrome settings.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/products-and-platforms/products/chrome/enhanced-autofill-gmail

51. Google Gen AI SDK releases 2.34.0

PyPI records google-genai version 2.34.0, uploaded on 2026-10-29.

Evidence: The PYPI Google Gen AI SDK release records 2.34.0 for Google.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: pypi.org · https://pypi.org/project/google-genai/2.34.0/

52. How to build evidence-grounded agent memory with OpenWiki and Graphs

Adding an evidence graph helps agents follow the wiki back to supporting evidence.

Evidence: The LangChain Blog page documents the LangChain update.

Impact: Teams can evaluate the documented LangChain workflow before wider rollout.

Watch next: Watch the LangChain release for patch notes and rollout issues.

Source: www.langchain.com · https://www.langchain.com/blog/building-agent-memory-openwiki-graphs

53. How to Build Proactive, Always-On Agents with the Schedules SDK in Managed Deep Agents

Launches like Muse, Instinct, Dots, Claude Duet, Hone, and more reflect this.

Evidence: The LangChain Blog page documents the LangChain update.

Impact: Teams can evaluate the documented LangChain workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: www.langchain.com · https://www.langchain.com/blog/proactive-agents

54. Context Engineering with Deep Agents: How To Remember Without Keeping Everything In Context

The more history, noise, and tool output a model carries, the worse its accuracy and reasoning tend to get.

Evidence: The LangChain Blog page documents the LangChain update.

Impact: Teams can evaluate the documented LangChain workflow before wider rollout.

Watch next: Watch the LangChain release for patch notes and rollout issues.

Source: www.langchain.com · https://www.langchain.com/blog/context-engineering-deep-agents-remember

Finance Daily

3 source-linked editorial stories.

1. Household real income per capita slightly increases in both the euro area and the EU

Eurostat Releases reports: Household real income per capita slightly increases in both the euro area and the EU.

Evidence: Eurostat Releases reports: In the second quarter of 2026, household real income per capita increased by 0.1% in the euro area, after an increase of 0.1% in the first quarter of 2026.

Impact: In the same period, household real consumption per capita increased by 0.3%, after having stayed stable in the previous quarter.

Limits: Next official filing or company update

Watch next: Watch the next official macro release, ECB rate expectations, euro funding conditions, and index breadth.

2. Bitcoin down 0.8% at $80,151 on CoinGecko data

Bitcoin down 0.8% at $80,151 on CoinGecko data.

Evidence: CoinGecko Bitcoin price data reports: $80,151 (down 0.8%).

Impact: CoinGecko price data show Bitcoin at $80,151, down 0.8% from $80,777 over the past 24 hours.

Limits: Bitcoin down 0.8% at $80,151: firmer rates or sticky inflation could reverse the liquidity and equity-risk read

Watch next: Watch whether Bitcoin holds the move as Wall Street opens, and how the dollar and Treasury yields respond.

Source: api.coingecko.com · https://api.coingecko.com/api/v3/coins/bitcoin/market_chart/range?vs_currency=usd&from=1793170800&to=1793257199

3. Ether down 1.2% at $2,321 on CoinGecko data

Ether down 1.2% at $2,321 on CoinGecko data.

Evidence: CoinGecko Ether price data reports: $2,321 (down 1.2%).

Impact: CoinGecko price data show Ether at $2,321, down 1.2% from $2,349 over the past 24 hours.

Limits: Ether down 1.2% at $2,321: firmer rates or sticky inflation could reverse the liquidity and equity-risk read

Watch next: Watch whether Ether holds the move as Wall Street opens, and how the dollar and Treasury yields respond.

AI Daily

This is AI Daily. Here are the key changes and primary source details.

Follow nvidia Nune Tadevosyan nunetadevosyan Follow nvidia Meline Mkrtchyan mmkrtchyan Follow nvidia Nithin Rao Koluguri nithinraok Follow nvidia Francesco fciannella Follow nvidia One open model for multilingual transcription, speaker attribution, translation, and audio Q&A, with top leaderboard results, plus the open Granary v2 data pipeline and fine-tuning recipes to adapt it. A transcript can capture every spoken word and still leave users or applications wondering who said what, how to translate it, or how to format domain-specific jargon. Multilingual calls, fast-paced meetings, and medical dictation each need different output: a translation, speaker labels, or correctly spelled medical

terms. NVIDIA Nemotron 3.5 Transcribe is an open-weight, promptable model that turns recorded speech into useful text, now available on Hugging Face and ModelScope .

The CrowdStrike Prompt Injection Taxonomy, built and maintained by CrowdStrike AI security researchers, offers the industry's most comprehensive framework for understanding and defending against the ever-expanding array of attack techniques. Today Crowdstrike is introducing a new version of the taxonomy that adds newly discovered attack techniques on autonomous agents and how they plan.

It shows significant gains across coding and agentic tasks as well as across key capabilities critical for cybersecurity defense, landing a firm lead in SEC-bench Pro (88.2%) for finding vulnerabilities, ExploitGym (54.8%) for exploitation, and CWE-bench (71.0%) for patching. On internal benchmarks, Carbon drives a strong uplift in generating secure code, and in live coding environments with its own teams it shows reduced misalignment and fabrication rates.

GitHub Agentic Workflows, an open source project from GitHub Next, is now generally available. With agentic workflows, you can automate reasoning-based tasks like issue triage, CI failure analysis, documentation updates, and test writing by using coding agents inside GitHub Actions. Define your automation in natural language Markdown files, and GitHub Agentic Workflows compiles them into standard Actions YAML.

Build and manage Connected Apps in one place.

NVIDIA RTX Spark Windows Laptops Gain New Models. NVIDIA RTX Spark powers thin and light laptops built for everything that developers, creators and gamers do. RTX Spark laptops are now available from ASUS, Dell, HP, Lenovo, Microsoft and MSI.

GitHub Copilot app, Universe releases. Work doesn't always fit in a single repository or session.

Copilot Fusion brings together Project HydraFusion’s multi-model orchestration and Copilot auto model selection’s fine-tuned model selection, leveraging the benefits of both to balance performance and cost efficiency. Since Project HydraFusion launched, we’ve improved its performance. In the Artificial Analysis Coding Agent Index, Copilot Fusion Max scored 60, within two points of Claude Code with Opus 5.5 Max.

OpenAI and ServiceNow expand partnership across enterprise workflows. The expansion builds on its partnership announced in January, bringing OpenAI into more of the work ServiceNow does for its customers and within its own business.

OpenAI: Starting today, eligible ChatGPT Pro. Starting today, eligible ChatGPT Pro and Business subscribers can claim up to $500 per month in API credits to build apps and agents.

Diffuspace publishes Clover 35 B, A 3 B, Preview G G U F model repository.

Today, Microsoft is introducing the Microsoft Copilot harness in Foundry Agent Service in public preview. It gives developers a fully managed way to build agents that reason, use tools, and complete complex, long-running tasks.

Today, Mistral AI is introducing the Responses API in public preview, made for building agents on Mistral. Each response returns the model’s answer, its reasoning and its tool calls as separate items, so your app can handle every step more easily than with Chat Completions.

Repository plugin defaults and enterprise plugin controls generally available. Repository plugin defaults and enterprise-managed plugin controls are now generally available in VS Code, Copilot CLI, and the GitHub Copilot app. Enterprises can require plugins, block plugins, and restrict installation to approved marketplaces.

Win the Agentic Era, Together. Docker is launching the Navigator Partner Program, with three tiers, co-selling benefits, and a new incentive for every registered AI governance deal.

ViBench 2.0: A Benchmark for Long-Horizon Software Building.

The Joint Undertaking for Morphological Profiling-Cell Painting (JUMP-CP) consortium represents a notable collaborative effort to standardize and expand the use of cell painting assays. This large-scale open-source initiative has generated over 100 TB of data, encompassing millions of high-content images from more than 120,000 chemical and genetic perturbations acquired across 12 pharmaceutical companies and academic institutions (that is, sources).

Build shared workflows for your team with Copilot Automations. Shared Copilot Automations are rolling out, enabling teams to build and maintain AI-powered workflows together.

Introducing the Microsoft Copilot harness. If you want to compete, you need to be multi-model.

Artificial Analysis: We are launching A A Video I 2 V v2.1. Artificial Analysis is launching A A Video I 2 V v2.1 and A A Video I 2 V Silent v2.1, its new benchmark for evaluating image to video models.

OpenAI Codex documents how banked usage resets work. OpenAI-granted banked reset: A free, one-time reset saved to your account for later use, including resets earned through qualifying referral promotions. Receiving one does not refresh your usage; you choose when to use it before it expires.

This study finds that reasoning-enabled AI models improve diagnostic accuracy but produce more false positives and less consistent outputs but physician oversight helps retain benefits while reducing safety risks.

Legora is building the agentic operating system. See how Legora uses OpenAI models, ChatGPT, and Codex to accelerate legal workflows, expand contract analysis, and free lawyers to focus on higher-value work.

OpenAI: Install the OpenAI Developers plugin in ChatGPT or Codex to create an API key and start your first project.

Security extension for the GitHub Copilot app. The security extension is in public preview on github.com and GitHub Enterprise Cloud with data residency.

XREAL AURA: Wired XR glasses to watch, work. The first wired XR glasses powered by Android XR bring your apps, your shows, and help from Gemini wherever you go. Orders open today in the U.S., Canada, and Korea, and on November 2 in Japan.

GitHub Copilot in VS Code, Universe releases. Check progress, give direction, or start a new task on your development machine from GitHub Mobile. Your phone provides the controls, and the agent does the work on your development machine.

GitHub Enterprise includes access to GitHub Copilot. Enterprises working with a GitHub or Microsoft account team can now get Copilot included with GitHub Enterprise for every licensed user. Previously, you had to manage two things: how many Copilot seats you were paying for and how much AI usage those users consumed.

Replit's Architecture Behind Secure Agent Work. Last week’s security disclosures offered a glimpse of the challenges ahead. AI agents are making vulnerabilities faster and easier to find, while the time from discovery to exploitation continues to shrink.

OpenAI Model Spec. The Model Spec specifies desired behavior for the models underlying OpenAI's products (including its APIs).

Forced alignment with Cue: Character-level audio timing. Today, ElevenLabs is sharing more on Cue, a forced alignment model that places every character in an audio file on a precise timeline. Cue powers ElevenLabs’ Scribe model family, and on real-world recordings, it’s more accurate than every aligner ElevenLabs tested, in all 29 languages of the benchmark.

But they're only a small part of what machine learning can do. Say a customer calls your support line. First, you want to know what they said (speech recognition). Then, you want to decide where to send them (decision). You could hand both to a language model, but there are models built for each that are better, faster, and less expensive. In its AnyLanguageModel 1.0 recap , we looked at a year of local and hosted models in Swift. With AnyLanguageModel and swift-huggingface now on their 1.x releases, we're extending the same approach to speech and decisions: familiar Swift APIs with a choice of model.

The GitHub Copilot app now supports Projects to manage work across multiple repos and tools in one place. Copilot coordinates tasks using context from repos, design files, Slack, and notes.

Welcome L E Chonk: Mistral Large 4 on Hugging Face.

Build Generative UI Apps with A 2 U I & CopilotKit Agents.

Credit Saison achieves 954% ROI. The company also operates financing and international businesses.

The Gemini app now has a library of immersive explorations, giving you an interactive, visual way to explore topics layer-by-layer, from microscopic systems to deep space and more. You can access this library in the Gemini student hub by clicking on “Try immersive explorations” and will soon be able to access these immersive explorations directly in a chat conversation with Gemini.

T I B O (OpenAI): Team is working. Team is working on this but it's not rolling out just yet, sorry for any confusion.

Cognition: Founded by three 22-year-olds in 2023. Founded by three 22-year-olds in 2023, @mercor crossed $2 billion ARR in June, only 4 months after hitting $1 billion.

ElevenLabs: New from ElevenLabs research. That means the right words show up at the right time.

GitHub intelligence puts your code, context, and history. Agents should understand more than your codebase—they should understand how your team works.

OpenAI: By popular request, you can text your dot. By popular request, you can now text your dot.

Gemini Notebook: This is available to ALL users. This is now available to ALL users on mobile ■■ Have you used it yet? Powered by its latest audio models, ask questions about your sources and get step-by-step guidance (almost) completely hands-free.

Announcing Project ProtoStar: Making Publicly Funded Science AI-Ready. An initiative bringing together universities, research organizations, industry, and the open science community to make publicly funded research easier to discover, reuse, and build upon.

Meta: Today we're announcing support for university research. Today AI at Meta is announcing support for university research at @Caltech, @OhioStateMed, @LSU, @IndianaUniv, and @UTHealthHouston to help advance breakthroughs across science and medicine.

New global AI computing capacity is doubling every 9 months | Epoch AI Quarterly additions of computing capacity have grown about 2 point 5 times per year since 2024.

Github: Commands. This document details all commands supported by Qwen Code, helping you efficiently manage sessions, customize the interface, and control its behavior.

Ads in AI Mode expand to new markets.

Applying digital twins to prevent preterm births. One in ten pregnancies involves a preterm birth, usually without warning signs or known risk factors.

Chrome's enhanced autofill helps you fill out forms. As always, sensitive data is encrypted and you remain in control. You can manage whether enhanced autofill is enabled and what it can access via your Chrome settings.

Google Gen AI SDK releases 2.34.0. Py P I records google-genai version 2.34.0, uploaded on October 29, 2026.

How to build evidence-grounded agent memory with OpenWiki. Adding an evidence graph helps agents follow the wiki back to supporting evidence.

How to Build Proactive, Always-On Agents. Launches like Muse, Instinct, Dots, Claude Duet, Hone, and more reflect this.

Context Engineering with Deep Agents: How To Remember. The more history, noise, and tool output a model carries, the worse its accuracy and reasoning tend to get.

Review official release notes for rollout, pricing, limits, and compatibility.

Finance Daily

Finance Daily for October 29, 2026. Today's stories include Eurostat, Bitcoin and Ether, with primary sources linked below.

Household real income per capita slightly increases in both the euro area and the EU. Compared with the rate indicated in the news release of 27 July 2026, the growth rate of household real income per capita for the first quarter of 2026 was revised from 0.0% to 0.1% for the euro area and from 0.1% to 0.3% for the EU.

Bitcoin down 0.8% at $80,151 on CoinGecko data. CoinGecko Bitcoin price data reports: $80,151 (down 0.8%). CoinGecko price data show Bitcoin at $80,151, down 0.8% from $80,777 over the past 24 hours. Watch whether Bitcoin holds the move as Wall Street opens, and how the dollar and Treasury yields respond.

Ether down 1.2% at $2,321 on CoinGecko data. CoinGecko Ether price data reports: $2,321 (down 1.2%). CoinGecko price data show Ether at $2,321, down 1.2% from $2,349 over the past 24 hours. Watch whether Ether holds the move as Wall Street opens, and how the dollar and Treasury yields respond.

Watch the next official macro release, ECB rate expectations, euro funding conditions, and index breadth. Next official filing or company update.
