Two-series written report and verified spoken scripts

Daily report

AI Daily

13 source-linked editorial stories.

1. 5 Lessons from the AgentWorks Hackathon

It takes output from CrowdStrike's LogScale query assistant or the Falcon Next-Gen SIEM Correlation Rule Generation Agent and runs it through a fixed series of gates, including a check against a 196-function CrowdStrike Query Language (CQL) catalog, 23 silent-failure rules, and a reproducible unit test.

Evidence: Each one ends with a verdict: validated, validated with limits, or inconclusive.

Impact: Teams can evaluate the documented Crowdstrike workflow before wider rollout.

Watch next: Watch the Crowdstrike release for patch notes and rollout issues.

Source: www.crowdstrike.com · https://www.crowdstrike.com/en-us/blog/five-lessons-from-agentworks-hackathon

2. Make long-running agents faster with message threads

Message threads is now available in public beta on the Claude Platform.

Evidence: With message threads, agents no longer need to resend the full conversation history on every turn, reducing latency for long-running sessions.

Impact: Teams can evaluate the documented Claude workflow before wider rollout.

Watch next: Watch the Claude release for patch notes and rollout issues.

Source: claude.com · https://claude.com/resources/articles/message-threads

Source: the-decoder.com · https://the-decoder.com/anthropics-message-threads-cut-time-to-first-token-by-35-percent-for-long-conversations/

3. Genome-anchored foundation model embeddings improve molecular prediction from histology images

Here we introduce PathLUPI, which uses transcriptomic privileged information during training to extract genome-anchored histological embeddings, enabling effective molecular prediction using only WSIs at inference.

Evidence: Through extensive evaluation across 49 molecular oncology tasks using 11,361 cases from 20 cohorts, PathLUPI demonstrates superior performance compared to conventional methods trained solely on WSIs.

Impact: Teams can evaluate the documented Nature workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: www.nature.com · https://www.nature.com/articles/s41467-026-78947-2

4. Sakana: Sakana AI

If everything goes smoothly, the first model, a small model called "Sawara Small" (provisional name), will be released in spring 2027.

Evidence: We organized this symposium to share our ambitions now that Professor Schmidhuber has joined us, and as a starting point for opening up the next era of AI together with companies and research institutions across Japan.

Impact: Teams can evaluate the documented Sakana AI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: sakana.ai · https://sakana.ai/symposium-2026

5. Progress on provable inference for large language models

Progress on provable inference for large language models.

Evidence: The Anthropic (official) page documents the Anthropic update.

Impact: Teams can evaluate the documented Anthropic workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: www.anthropic.com · https://www.anthropic.com/research/provable-inference

Source: techcrunch.com · https://techcrunch.com/2026/11/03/anthropic-is-working-on-a-system-to-prove-ai-models-identity/

6. Qodo builds context into AI code review with Codex

OpenAI reports: Qodo builds context into AI code review with Codex.

Evidence: The OpenAI page documents the Codex update.

Impact: Teams can evaluate the documented Codex workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: openai.com · https://openai.com/index/qodo-codex-plugin

7. OpenAI appoints Dan Driscoll as Senior Counselor for National Security Modernization

He brings experience spanning military service, senior government leadership, and the private sector.

Evidence: In his role, Dan will advise our public and private sector partners in modernizing policy and strategy choices to unlock practical uses of AI to improve national security and help ensure the world is building AI to support democratic principles.

Impact: In this newly created role, Dan will work with OpenAI teams and leaders across governments, industry, academia, and allied institutions to advance practical modernization initiatives that support the buildout of democratic AI.

Watch next: watch security notes, rollout controls.

Source: openai.com · https://openai.com/index/dan-driscoll-joins-openai

8. Openai: LifeVal

That means going beyond academic assessments of model knowledge and actually measuring how well AI models can help people navigate decisions, manage everyday responsibilities, and get meaningful things done.

Evidence: Openai is hopeful that LifeVal represents a step towards that goal.

Impact: Teams can evaluate the documented Openai workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: openai.com · https://openai.com/index/lifeval

9. paperless-ngx, from paperless-ngx, gained 66 GitHub stars in a day

Getting started The easiest way to deploy paperless is docker compose.

Evidence: The GitHub: paperless-ngx/paperless-ngx page documents the paperless-ngx update.

Impact: Teams can evaluate the documented paperless-ngx workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

10. Giving every team a data scientist with Grok Bot

Download for macOS Contact sales At SpaceXSI, its data science team works across the company, helping teams answer difficult questions and finding new ways to incorporate data into its products.

Evidence: People come to us throughout the day with questions that may be straightforward but still require its expertise to answer accurately.

Impact: Teams can evaluate the documented X workflow before wider rollout.

Watch next: watch availability, limits, and real usage for X.

Source: x.ai · https://x.ai/news/data-bot

11. Re-timing mortality risk through individualized modelling of lifespan trajectories

Abstract There is an urgent global need for affordable, large-scale health screening to enhance preventive care in the ageing population.

Evidence: Trained on a European cohort and externally validated across three independent external cohorts spanning Southeast Asia, Eurasia and North America, RetiME showed robust associations with all-cause and cause-specific mortality and predicted the incidence of a wide range of systemic and ocular diseases.

Impact: Teams can evaluate the documented Nature workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: www.nature.com · https://www.nature.com/articles/s41551-026-01822-4

12. onnxruntime, from microsoft, gained 12 GitHub stars in a day

ONNX Runtime is compatible with different hardware, drivers, and operating systems, and provides optimal performance by leveraging hardware accelerators where applicable alongside graph optimizations and transforms.

Evidence: The GitHub: microsoft/onnxruntime page documents the microsoft update.

Impact: Teams can evaluate the documented microsoft workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

13. AI-on-the-edge-device, from jomjol, gained 10 GitHub stars in a day

With affordable hardware and simple instructions, you can turn any standard meter into a smart device.

Evidence: The GitHub: jomjol/AI-on-the-edge-device page documents the jomjol update.

Impact: Teams can evaluate the documented jomjol workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.com · https://github.com/jomjol/AI-on-the-edge-device

Finance Daily

2 source-linked editorial stories.

1. Bitcoin up 0.4% at $78,289 on CoinGecko data

Bitcoin up 0.4% at $78,289 on CoinGecko data.

Evidence: CoinGecko Bitcoin price data reports: $78,289 (up 0.4%).

Impact: CoinGecko price data show Bitcoin at $78,289, up 0.4% from $77,973 over the past 24 hours.

Limits: Bitcoin up 0.4% at $78,289: firmer rates or sticky inflation could reverse the liquidity and equity-risk read

Watch next: Watch whether Bitcoin holds the move as Wall Street opens, and how the dollar and Treasury yields respond.

Source: api.coingecko.com · https://api.coingecko.com/api/v3/coins/bitcoin/market_chart/range?vs_currency=usd&from=1793516400&to=1793602799

2. Ether up 0.9% at $2,289 on CoinGecko data

Ether up 0.9% at $2,289 on CoinGecko data.

Evidence: CoinGecko Ether price data reports: $2,289 (up 0.9%).

Impact: CoinGecko price data show Ether at $2,289, up 0.9% from $2,268 over the past 24 hours.

Limits: Ether up 0.9% at $2,289: firmer rates or sticky inflation could reverse the liquidity and equity-risk read

Watch next: Watch whether Ether holds the move as Wall Street opens, and how the dollar and Treasury yields respond.

Source: api.coingecko.com · https://api.coingecko.com/api/v3/coins/ethereum/market_chart/range?vs_currency=usd&from=1793516400&to=1793602799
