INSIGHT DAILY

2026-11-07

Two-series written report and verified spoken scripts

Daily report

AI Daily

28 source-linked editorial stories.

1. Taxbit Assist: A grounded, role-aware AI agent on Amazon Bedrock AgentCore

Founded in 2018, Taxbit helps enterprises such as exchanges, payment services, and brokers calculate gains and losses, collect tax documentation, and file information returns at scale.

Evidence: Now, a cited, permission-aware AI assistant helps compliance teams find answers right inside the product dashboard.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: Watch the AWS release for patch notes and rollout issues.

Source: aws.amazon.com · https://aws.amazon.com/blogs/machine-learning/taxbit-assist-a-grounded-role-aware-ai-agent-on-amazon-bedrock-agentcore/

2. AWS: Kimi K3.1 Pro (Highspeed) now available on Amazon Bedrock

Customers using Amazon Bedrock can now run agentic use cases such as coding and document processing on Kimi K3.1 Pro (Highspeed), which delivers high output tokens per second (OTPS) for faster, more responsive results.

Evidence: The AWS What's New release records now available for AWS.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: Watch AWS What's New for recovery confirmation and further AWS incidents.

Source: aws.amazon.com · https://aws.amazon.com/about-aws/whats-new/2026/11/moonshot-ai-kimi-k3-1-pro-on-amazon-bedrock

3. Varun Mohan (Google): Resetting everyones Gemini and Argon quota on Antigravity.

Resetting everyone's Gemini and Argon quota on Antigravity.

Evidence: Lots of updates this week so want to make sure everyone can build for the weekend.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch pricing, quota, and account limits for Google.

Source: x.com · https://x.com/_mohansolo/status/2118855362518675720

Source: antigravity.google · https://antigravity.google/docs/voice-mode

4. Copilot code review: API management and review overview updates

You can now manage GitHub Copilot code review settings through the REST and GraphQL APIs, from enterprise policy down to individual repositories.

Evidence: The GitHub Changelog page documents the GitHub Copilot update.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: github.blog · https://github.blog/changelog/2026-11-06-copilot-code-review-api-management-and-review-overview-updates

5. Anthropic: Memory is what allows Claude to learn from experience.

Memory is what allows Claude to learn from experience.

Evidence: The X @AnthropicAI page documents the Anthropic update.

Impact: Teams can evaluate the documented Anthropic workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/AnthropicAI/status/2118814753154064501

Source: www.anthropic.com · https://www.anthropic.com/research/components-of-agent-memory

6. Anthropic: We've made it easier to get your repo running in Claude Code cloud sessions on Pro, Max, and Ultra.

Claude figures out what dependencies, network access, and API keys it needs, then saves the environment for next time.

Evidence: API keys are saved securely, so Claude never sees them.

Impact: Teams can evaluate the documented Anthropic workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/ClaudeDevs/status/2118795192090386454

7. OpenAI: A new way to measure how AI agents handle the routine analyses of wet-lab scienceBioBasicsBench.

A new way to measure how AI agents handle the routine analyses of wet-lab science-BioBasicsBench.

Evidence: Developed with Ligo, a biotech company focused on enzyme design, the benchmark draws on 100 tasks from real experiments to test whether agents can interpret raw lab data, identify Posted 2026-11-06.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: Watch the OpenAI release for patch notes and rollout issues.

Source: x.com · https://x.com/OpenAI/status/2118782708767965238

8. OpenAI: Kickstart your weekend build with the new Showcase tab in the OpenAI Developers plugin.

Kickstart your weekend build with the new Showcase tab in the OpenAI Developers plugin.

Evidence: Eligible ChatGPT Pro and Business subscribers can claim API credits in billing settings to cover their app’s API usage.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: x.com · https://x.com/OpenAIDevs/status/2118856544733532452

9. Copilot impact dashboard adds chat and VS Code agent usage

The Agent adoption chart in the Copilot impact dashboard now includes Copilot Chat and the VS Code Agents window, so you can see engagement across nine Copilot experiences.

Evidence: The enterprise and organization 28-day usage metrics reports include the same two features.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: watch pricing, quota, and account limits for GitHub.

Source: github.blog · https://github.blog/changelog/2026-11-06-copilot-impact-dashboard-adds-chat-and-vs-code-agent-usage

10. AWS: Extend Claude Code to remote sessions on Amazon Bedrock AgentCore with security controls

This post shows how to go a step further: run it as a remote agent on Amazon Bedrock AgentCore, a platform to build, connect, and optimize agents at scale, with any framework or model.

Evidence: The sample uses AgentCore runtime, a capability of Amazon Bedrock AgentCore, so every task runs in its own isolated session inside your AWS account.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: watch security notes, rollout controls.

Source: aws.amazon.com · https://aws.amazon.com/blogs/machine-learning/extend-claude-code-to-remote-sessions-on-amazon-bedrock-agentcore-with-security-controls/

11. Text, shop, done: Alexa for Shopping is now just a text away

Text, shop, done: Alexa for Shopping is now just a text away.

Evidence: The Amazon News page documents the Amazon update.

Impact: Teams can evaluate the documented Amazon workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: www.aboutamazon.com · https://www.aboutamazon.com/news/retail/alexa-for-shopping-text-to-shop?utm_source=rss

12. AWS: Serverless MCP server for AI agent data lake access on Amazon ECS Fargate

Most teams begin by wiring agents directly to databases and APIs, with no shared gateway such as a Model Context Protocol (MCP) server in between.

Evidence: Each new dataset demands custom code, and each agent reimplements its own access control.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: Watch the AWS release for patch notes and rollout issues.

Source: aws.amazon.com · https://aws.amazon.com/blogs/machine-learning/serverless-mcp-server-for-ai-agent-data-lake-access-on-amazon-ecs-fargate/

13. Beyond code generation: A developer's guide to agentic engineering

See how you can plan, write code, review changes, and investigate production issues with GitHub Copilot.

Evidence: The GitHub Blog page documents the GitHub Copilot update.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: github.blog · https://github.blog/ai-and-ml/github-copilot/beyond-code-generation-a-developers-guide-to-agentic-engineering

14. Create videos with code

Remotion came out in 2021, way before agents were the hype.

Evidence: The Remotion Documentation page documents the Remotion update.

Impact: Teams can evaluate the documented Remotion workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: www.remotion.dev · https://www.remotion.dev/docs/create-videos-with-code

15. Agent Skills

Remotion maintains a list of Agent Skills that define best practices for working in Remotion projects.

Evidence: These skills are useful for AI agents like Claude Code, Codex, Kimi Code or Cursor.

Impact: Teams can evaluate the documented Remotion workflow before wider rollout.

Watch next: Watch the Remotion release for patch notes and rollout issues.

Source: www.remotion.dev · https://www.remotion.dev/docs/ai/skills

Source: github.com · https://github.com/google/skills

16. AWS: Govern AI agent access with Okta Cross App Access and Amazon Bedrock AgentCore

The agent runs on Amazon Bedrock AgentCore runtime, a capability of Amazon Bedrock AgentCore, and acts for signed-in users through Okta Cross App Access (XAA).

Evidence: Okta decided which agent might act for which user, and Amazon Bedrock AgentCore Identity, a capability of Amazon Bedrock AgentCore, redeemed Okta's grant inside the agent.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: Watch the AWS release for patch notes and rollout issues.

Source: aws.amazon.com · https://aws.amazon.com/blogs/machine-learning/govern-ai-agent-access-with-okta-cross-app-access-and-amazon-bedrock-agentcore-part-2/

Source: aws.amazon.com · https://aws.amazon.com/blogs/machine-learning/govern-ai-agent-access-with-okta-cross-app-access-and-amazon-bedrock-agentcore-part-1

17. AWS: Taxonomy of agentic primitives in Amazon Quick

The same few ideas kept getting rebuilt under different names: an actor that does the work, a signal that starts it, a packaged procedure, and a memory that carries lessons forward.

Evidence: The AWS Machine Learning Blog page documents the AWS update.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: Watch the AWS release for patch notes and rollout issues.

Source: aws.amazon.com · https://aws.amazon.com/blogs/machine-learning/taxonomy-of-agentic-primitives-in-amazon-quick/

18. GitHub Copilot weekly releases - November 2

My Work now supports more than ten saved custom views.

Evidence: Give Copilot guidance on which tool requests to approve without asking you.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.blog · https://github.blog/changelog/2026-11-06-github-copilot-weekly-releases-november-2

19. Agent Registry is now generally available in AWS GovCloud (US-West) Region

AWS Agent Registry, available through Amazon Bedrock AgentCore, is now available in the AWS GovCloud (US-West) Region.

Evidence: AWS Agent Registry is a fully managed discovery service that gives your organization a central catalog for organizing, curating, and discovering resources.

Impact: You can publish MCP servers, tools, agents, agent skills, and custom resources to a searchable registry, and control what becomes discoverable through an approval workflow.

Watch next: Watch AWS What's New for recovery confirmation and further AWS incidents.

Source: aws.amazon.com · https://aws.amazon.com/about-aws/whats-new/2026/11/aws-agent-registry-govcloud-us-west/

20. ToyBlocks: A controlled world for robot learning and evaluation

Robots are learning to fold laundry, sort parts, and handle unfamiliar objects.

Evidence: The Hugging Face page documents the Ai2 update.

Impact: Teams can evaluate the documented Ai2 workflow before wider rollout.

Watch next: watch availability, limits, and real usage for Ai2.

Source: huggingface.co · https://huggingface.co/blog/allenai/toyblocks

21. AWS: How Greenlight Financial built an autonomous SOC solution on Amazon Bedrock AgentCore

Greenlight Financial resolves more than 90% of up to 4,000 monthly security and risk cases without human intervention using Luna, a tiered multi agent system on Amazon Bedrock AgentCore.

Evidence: The AWS Machine Learning Blog page documents the AWS update.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: Watch the AWS release for patch notes and rollout issues.

Source: aws.amazon.com · https://aws.amazon.com/blogs/machine-learning/how-greenlight-financial-built-an-autonomous-soc-solution-on-amazon-bedrock-agentcore/

22. Hugging Face Transformers publishes Patch release v5.22.2

Patch release v5.22.2 Some in between patch for security and distributed fixes.

Evidence: The Hugging Face Transformers release records v5.22.2 for Hugging Face Transformers.

Impact: Teams can evaluate the documented Hugging Face Transformers workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.com · https://github.com/huggingface/transformers/releases/tag/v5.22.2

23. Notion: We made a Notion plugin for ChatGPT!

We made a Notion plugin for @ChatGPT!

Evidence: Use the real Notion editor, right inside ChatGPT.

Impact: Teams can evaluate the documented Notion workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/NotionHQ/status/2118753617637409000

24. AWS Elemental MediaConvert adds a native integration with AWS Elemental Inference Smart Subtitles

This feature brings automated subtitle generation directly into your video-on-demand (VOD) transcoding and packaging workflows, eliminating the need for separate external captioning pipelines.

Evidence: Customers can now manage both transcoding and subtitle creation within a single, unified workflow. Smart subtitles automatically transcribe your audio into subtitles with native support for six languages including English, French, German, Italian, Portuguese, and Spanish.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: Watch AWS What's New for recovery confirmation and further AWS incidents.

Source: aws.amazon.com · https://aws.amazon.com/about-aws/whats-new/2026/11/mediaconvert-elemental-smart-subtitles/

25. AWS: SageMaker Inference now supports Multi-Instance GPU to maximize GPU utilization for model endpoints

Amazon SageMaker Inference now supports GPU partitioning with NVIDIA Multi Instance GPU (MIG), which divides one GPU into hardware isolated partitions so you can run a different model in each or take a right sized fraction of a newer accelerator.

Evidence: The AWS Machine Learning Blog page documents the AWS update.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: aws.amazon.com · https://aws.amazon.com/blogs/machine-learning/sagemaker-inference-now-supports-multi-instance-gpu-to-maximize-gpu-utilization-for-model-endpoints/

26. Anthropic: New on our Science Blog: How AI is beginning to change scientific modeling.

New on its Science Blog: How AI is beginning to change scientific modeling.

Evidence: Scientific models help researchers explain and predict real-world systems-like how a single nerve cell fires, or what happens when neutron stars collide.

Impact: Teams can evaluate the documented Anthropic workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: x.com · https://x.com/AnthropicAI/status/2118792930211107115

27. NVIDIA: Accelerating Reinforcement Learning Weight Refit with the Reshard Collective

During reinforcement learning (RL) post-training, training trajectories are generated on the fly by running inference with the current policy model.

Evidence: For training efficiency, it is common to run inference and training in parallel on separate GPU resources in a disaggregated setup.

Impact: Teams can evaluate the documented NVIDIA workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: developer.nvidia.com · https://developer.nvidia.com/blog/accelerating-reinforcement-learning-weight-refit-with-the-reshard-collective/

28. servo, from servo, gained 55 GitHub stars in a day

Servo is a prototype web browser engine written in the Rust language.

Evidence: It is currently developed on 64-bit macOS, 64-bit Linux, 64-bit Windows, 64-bit OpenHarmony, and Android.

Impact: Teams can evaluate the documented servo workflow before wider rollout.

Watch next: watch availability, limits, and real usage for servo.

Source: github.com · https://github.com/servo/servo

Source: github.com · https://github.com/trending?since=daily&spoken_language_code=en

Finance Daily

4 source-linked editorial stories.

1. U.S. crude oil imports from Venezuela in July were highest since 2017

EIA Today in Energy reports: U.S. crude oil imports from Venezuela in July were highest since 2017.

Evidence: EIA Today in Energy title includes 701,000,655,000.

Impact: The official print can affect the relevant central bank's rate expectations, local funding conditions, and global equity risk appetite.

Limits: U.S. crude oil imports from: firmer rates or sticky inflation could reverse the liquidity and equity-risk read

Watch next: Watch the next official macro release, the relevant central bank's rate expectations, local funding conditions, and index breadth.

Source: www.eia.gov · https://www.eia.gov/todayinenergy/detail.php?id=68425

2. Bitcoin up 0.5% at $75,962 on CoinGecko data

Bitcoin up 0.5% at $75,962 on CoinGecko data.

Evidence: Bitcoin started the 24-hour window at $75,621, according to CoinGecko.

Impact: CoinGecko price data show Bitcoin at $75,962, up 0.5% from $75,621 over the past 24 hours.

Limits: Bitcoin up 0.5% at $75,962: firmer rates or sticky inflation could reverse the liquidity and equity-risk read

Watch next: Watch whether Bitcoin and Ether extend or reverse these moves as Wall Street opens, and how the dollar and Treasury yields respond.

Source: api.coingecko.com · https://api.coingecko.com/api/v3/coins/bitcoin/market_chart/range?vs_currency=usd&from=1793948400&to=1794034799

3. Ether up 1.0% at $2,247 on CoinGecko data

Ether up 1.0% at $2,247 on CoinGecko data.

Evidence: Ether started the 24-hour window at $2,226, according to CoinGecko.

Impact: CoinGecko price data show Ether at $2,247, up 1.0% from $2,226 over the past 24 hours.

Limits: Ether up 1.0% at $2,247: firmer rates or sticky inflation could reverse the liquidity and equity-risk read

Watch next: Watch whether Bitcoin and Ether extend or reverse these moves as Wall Street opens, and how the dollar and Treasury yields respond.

AI Daily

This is AI Daily. Today: Taxbit Assist, A grounded, role-aware AI agent on Amazon Bedrock AgentCore; and GitHub introduces API management for Copilot reviews.

Founded in 2018, Taxbit helps enterprises such as exchanges, payment services, and brokers calculate gains and losses, collect tax documentation, and file information returns at scale. Now, a cited, permission-aware AI assistant helps compliance teams find answers right inside the product dashboard.

Customers using Amazon Bedrock can now run agentic use cases such as coding and document processing on Kimi K 3.1 Pro (Highspeed), which delivers high output tokens per second (OTPS) for faster, more responsive results.

Varun Mohan (Google): Resetting everyones Gemini and Argon quota. Resetting everyone’s Gemini and Argon quota on Antigravity. Lots of updates this week so want to make sure everyone can build for the weekend.

You can now manage GitHub Copilot code review settings through the REST and GraphQL APIs, from enterprise policy down to individual repositories. Copilot’s review overview comment is now more compact, and this update includes fixes

for billing, automatic reviews, and reliability. These updates are available to Copilot Pro, Pro Plus, Max, Business, and Enterprise plans.

Anthropic: Memory is what allows Claude to learn. Memory is what allows Claude to learn from experience.

ClaudeDevs has made it easier to get your repo running in Claude Code cloud sessions on Pro, Max, and Ultra. Claude figures out what dependencies, network access, and API keys it needs, then saves the environment for next time. API keys are saved securely, so Claude never sees them.

A new way to measure how AI agents handle the routine analyses of wet-lab science—BioBasicsBench. Developed with Ligo, a biotech company focused on enzyme design, the benchmark draws on 100 tasks from real experiments to test whether agents can interpret raw lab data, identify.

Kickstart your weekend build with the new Showcase tab in the OpenAI Developers plugin. Eligible ChatGPT Pro and Business subscribers can claim API credits in billing settings to cover their app’s API usage.

The Agent adoption chart in the Copilot impact dashboard now includes Copilot Chat and the VS Code Agents window, so you can see engagement across nine Copilot experiences. The enterprise and organization 28-day usage metrics reports include the same two features.

This post shows how to go a step further: run it as a remote agent on Amazon Bedrock AgentCore, a platform to build, connect, and optimize agents at scale, with any framework or model. The sample uses AgentCore runtime, a capability of Amazon Bedrock AgentCore, so every task runs in its own isolated session inside your A W S account.

Text, shop, done: Alexa for Shopping is now just a text away.

A W S: Serverless MCP server. Most teams begin by wiring agents directly to databases and APIs, with no shared gateway such as a Model Context Protocol (MCP) server in between. Each new dataset demands custom code, and each agent reimplements its own access control.

Beyond code generation: A developer's guide to agentic engineering. See how you can plan, write code, review changes, and investigate production issues with GitHub Copilot.

Create videos with code. Remotion came out in 2021, way before agents were the hype.

Remotion maintains a list of Agent Skills that define best practices for working in Remotion projects. These skills are useful for AI agents like Claude Code, Codex, Kimi Code or Cursor.

A W S: Govern AI agent access. The agent runs on Amazon Bedrock AgentCore runtime, a capability of Amazon Bedrock AgentCore, and acts for signed-in users through Okta Cross App Access (XAA). Okta decided which agent might act for which user, and Amazon Bedrock AgentCore Identity, a capability of Amazon Bedrock AgentCore, redeemed Okta’s grant inside the agent.

The same few ideas kept getting rebuilt under different names: an actor that does the work, a signal that starts it, a packaged procedure, and a memory that carries lessons forward.

Archive pinned sessions whose pull requests have merged or closed, pin or unpin multiple sessions, and separate nested chats without losing the conversation. My Work now supports more than ten saved custom views. Give Copilot guidance on which tool requests to approve without asking you.

A W S Agent Registry, available through Amazon Bedrock AgentCore, is now available in the A W S GovCloud (US-West) Region. A W S Agent Registry is a fully managed discovery service that gives your organization a central catalog for organizing, curating, and discovering resources. You can publish MCP servers, tools, agents, agent skills, and custom resources to a searchable registry, and control what becomes discoverable through an approval workflow.

ToyBlocks: A controlled world for robot learning and evaluation. Robots are learning to fold laundry, sort parts, and handle unfamiliar objects.

Greenlight Financial resolves more than 90% of up to 4,000 monthly security and risk cases without human intervention using Luna, a tiered multi agent system on Amazon Bedrock AgentCore.

Hugging Face Transformers publishes Patch release v5.22.2. Patch release v5.22.2 Some in between patch for security and distributed fixes.

Notion made a Notion plugin for @ChatGPT! Use the real Notion editor, right inside ChatGPT. Create a page, watch it take shape as you chat, and jump in to edit it yourself.

A W S Elemental MediaConvert now integrates Smart Subtitles, an AI-powered subtitling solution built on A W S Elemental Inference and the latest speech recognition models. This feature brings automated subtitle generation directly into your video-on-demand (VOD) transcoding and packaging workflows, eliminating the need for separate external captioning pipelines. Customers can now manage both transcoding and subtitle creation within a single, unified workflow. ■Smart subtitles automatically transcribe your audio into subtitles with native support for six languages including English, French, German, Italian, Portuguese, and Spanish.

Amazon SageMaker Inference now supports GPU partitioning with NVIDIA Multi Instance GPU (MIG), which divides one GPU into hardware isolated partitions so you can run a different model in each or take a right sized fraction of a newer accelerator.

Anthropic: New on our Science Blog. New on its Science Blog: How AI is beginning to change scientific modeling. Scientific models help researchers explain and predict real-world systems—like how a single nerve cell fires, or what happens when neutron stars collide.

NVIDIA: Accelerating Reinforcement Learning Weight Refit. During reinforcement learning (RL) post-training, training trajectories are generated on the fly by running inference with the current policy model. For training efficiency, it is common to run inference and training in parallel on separate GPU resources in a disaggregated setup.

Servo, from servo, gained 55 GitHub stars. Servo is a prototype web browser engine written in the Rust language. It is currently developed on 64-bit macOS, 64-bit Linux, 64-bit Windows, 64-bit OpenHarmony, and Android.

Finance Daily

Finance Daily for November 7, 2026. Today's stories include EIA, Bitcoin and Ether, with primary sources linked below.

US crude oil imports from Venezuela in July were highest since 2017. In July 2026, U.S. imports of crude oil from Venezuela averaged 701,000 barrels per day (b/d), the most since May 2017, before decreasing to 655,000 b/d in August, according to data published in our Petroleum Supply Monthly.

Bitcoin up 0.5% at $75,962 on CoinGecko data. Bitcoin started the 24-hour window at $75,621, according to CoinGecko. The CoinGecko Bitcoin price series in US dollars is linked below. Watch whether Bitcoin and Ether extend or reverse these moves as Wall Street opens, and how the dollar and Treasury yields respond.

Ether up 1.0% at $2,247 on CoinGecko data. Ether started the 24-hour window at $2,226, according to CoinGecko. The CoinGecko Ether price series in US dollars is linked below.

ECB publishes consolidated banking data for end-June 2026. European Central Bank Press Releases reports: ECB publishes consolidated banking data for end-June 2026. The aggregate of total assets of EU-headquartered credit institutions increased by 5.18%, from €33.27 trillion in June 2025 to €34.99 trillion in June 2026. During the same period, EU credit institutions' aggregate non-performing loans ratio increased by 0.03 percentage points year on year to stand at 1.99% in June 2026. EU credit institutions' aggregate return on equity was 5.31% in June 2026 and their Common Equity Tier 1 ratio was 16.43%.

Watch the next official macro release, the relevant central bank's rate expectations, local funding conditions, and index breadth. US crude oil imports from: firmer rates or sticky inflation could reverse the liquidity and equity-risk read.
