INSIGHT DAILY

2026-11-11

Two-series written report and verified spoken scripts

Daily report

AI Daily

63 source-linked editorial stories.

1. Gemini 4 Carbon and /swarm

Put Gemini 4 Carbon to work with /swarm Working with a single agent works well for scoped tasks, but breaks down when a change spans dozens of files and test suites.

Evidence: Dynamic subagents evolved that into a primary agent spinning off isolated helper agents: powerful for delegating one-off tasks, but still bottlenecked by a single coordinator context reviewing, synthesizing, and routing every step.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: antigravity.google · https://antigravity.google/blog/gemini-4-carbon-in-google-antigravity

Source: x.com · https://x.com/GoogleAIStudio/status/2120187576489222302

2. Introducing the Multimodal Knowledge Agent benchmark

Yet, everyday professional work looks very different.

Evidence: The Reference discovery page documents the Google update.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: Watch the Google release for patch notes and rollout issues.

Source: blog.google · https://blog.google/innovation-and-ai/models-and-research/gemini-models/multimodal-knowledge-agent-benchmark

3. NVIDIA Expands Open Source Commitment With OpenShell Donation and New AI Infrastructure

Kubernetes, the open source system that manages how applications run across thousands of AI factories, has become the foundation for AI, and the demands on it are only growing.

Evidence: The Reference discovery page documents the NVIDIA update.

Impact: Teams can evaluate the documented NVIDIA workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: blogs.nvidia.com · https://blogs.nvidia.com/blog/open-source-openshell-infrastructure

4. Google Cloud launches Gemini for healthcare.

Google Cloud has announced Gemini for healthcare, an AI solution engineered to unify fragmented clinical, operational, and administrative systems.

Evidence: Moving beyond simple information retrieval, it enables healthcare teams to turn siloed data into coordinated action.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/innovation-and-ai/infrastructure-and-cloud/google-cloud/gemini-for-healthcare/

5. Cursor Projects is now multiplayer

Today Projects gets a major upgrade: it's now multiplayer.

Evidence: The Cursor page documents the Cursor update.

Impact: Teams can evaluate the documented Cursor workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: cursor.com · https://cursor.com/blog/projects-multiplayer

6. AWS: Autonomous treasury agents: How Trovata built an AI-native solution on Amazon Bedrock and AgentCore

In 2023, Trovata launched the first generative AI built specifically for treasury.

Evidence: The AWS Machine Learning Blog page documents the AWS update.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: Watch the AWS release for patch notes and rollout issues.

Source: aws.amazon.com · https://aws.amazon.com/blogs/machine-learning/autonomous-treasury-agents-how-trovata-built-an-ai-native-solution-on-amazon-bedrock-and-agentcore/

7. Anthropic: Rolling out on web and desktop.

Also new: with interactive connectors, you can now open the full version of a tool inside Claude.

Evidence: The X @claudeai page documents the Anthropic update.

Impact: Teams can evaluate the documented Anthropic workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/claudeai/status/2120206375137484875

8. OpenAI: We're turning our lessons from defending OpenAI into practical tools for our customers.

OpenAI is turning its lessons from defending OpenAI into practical tools for its customers.

Evidence: The X @OpenAI page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/OpenAI/status/2120202353907486826

9. Agent Substrate: Advancing Kubernetes for Agents at Scale

It multiplexes many sessions over a small pool of worker Pods.

Evidence: The NVIDIA AI Blog page documents the NVIDIA update.

Impact: Teams can evaluate the documented NVIDIA workflow before wider rollout.

Watch next: Watch the NVIDIA release for patch notes and rollout issues.

Source: developer.nvidia.com · https://developer.nvidia.com/blog/agent-substrate-advancing-kubernetes-for-agents-at-scale/

10. ReTrace: Distilling Tool-Using Agents into Planner-Free Workflows

Business process automation runs the same Standard Operating Procedure (SOP) again and again on new inputs.

Evidence: The arXiv Coding-Agent Research page documents the arXiv update.

Impact: Teams can evaluate the documented arXiv workflow before wider rollout.

Watch next: Watch the arXiv release for patch notes and rollout issues.

Source: arxiv.org · https://arxiv.org/abs/2611.14492v1

11. Anthropic: Anthropic has launched the roadshow for its proposed initial public offering

These securities may not be sold, nor may Posted 2026-11-10.

Evidence: The X @AnthropicAI page documents the Anthropic update.

Impact: Teams can evaluate the documented Anthropic workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/AnthropicAI/status/2120117722230968385

Source: www.anthropic.com · https://www.anthropic.com/news/roadshow-launch

12. Incorrect cost data in Costs API exports

Incorrect cost data in Costs API exports Resolved All affected services are operating normally again.

Evidence: OpenAI Status incident 01M71W79MAGEXEX93QTVTBYJ4K is dated 2026-11-10.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: Watch OpenAI Status for recovery confirmation and further OpenAI incidents.

Source: status.openai.com · https://status.openai.com//incidents/01M71W79MAGEXEX93QTVTBYJ4K

Source: status.openai.com · https://status.openai.com//incidents/01M6S2FV5TZWQ753NHRB7BF5K7

13. Start and Restore GPU Workloads in Seconds with NVIDIA Snapshot

When inference demand spikes or a replica fails, available GPUs don't translate immediately into serving capacity.

Evidence: The NVIDIA Developer page documents the NVIDIA update.

Impact: Teams can evaluate the documented NVIDIA workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: developer.nvidia.com · https://developer.nvidia.com/blog/start-and-restore-gpu-workloads-in-seconds-with-nvidia-snapshot

14. AMD Showcases 6th Gen AMD EPYC Processors to Lead Next Era of AI and Enterprise Computing

Powered by the new AMD "Zen 6" architecture, 6 th Gen EPYC CPUs deliver a broad portfolio of workload-optimized server CPUs spanning agentic AI, enterprise, cloud computing, HPC and general-purpose computing.

Evidence: The AMD Press Releases release records generally available for AMD.

Impact: Teams can evaluate the documented AMD workflow before wider rollout.

Watch next: watch availability, limits, and real usage for AMD.

Source: ir.amd.com · https://ir.amd.com/news-events/press-releases/detail/1305/amd-showcases-6th-gen-amd-epyc-processors-to-lead-next-era-of-ai-and-enterprise-computing

15. C++ language server now auto-configures MSBuild builds

The Microsoft C++ Language Server for GitHub Copilot CLI now bundles its MSBuild compile commands extractor and invokes it automatically.

Evidence: The GitHub Changelog page documents the Microsoft update.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.blog · https://github.blog/changelog/2026-11-10-c-language-server-now-auto-configures-msbuild-builds

16. AWS introduces Kimi K3.1 Pro on Amazon Bedrock

According to Moonshot AI, that extra training targets long-horizon agentic work and fewer factual errors.

Evidence: The AWS Machine Learning Blog release records now available for AWS.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: watch availability, limits, and real usage for AWS.

Source: aws.amazon.com · https://aws.amazon.com/blogs/machine-learning/introducing-kimi-k3-1-pro-on-amazon-bedrock/

17. Amazon Bedrock adds bedrock-runtime endpoint support for Daybreak models

Daybreak Red is designed for advanced, authorized tasks such as vulnerability research, exploit reproduction, and mitigation development.

Evidence: The source records 5.6 / GPT-5.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: Watch AWS What's New for recovery confirmation and further OpenAI incidents.

Source: aws.amazon.com · https://aws.amazon.com/about-aws/whats-new/2026/11/openai-gpt-daybreak-on-amazon-bedrock-runtime/

18. Cloudflare: Harnesses

Most people building new agents should start with the Pi harness.

Evidence: The Cloudflare Docs page documents the Cloudflare update.

Impact: Teams can evaluate the documented Cloudflare workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: developers.cloudflare.com · https://developers.cloudflare.com/agents/harnesses

Source: developers.cloudflare.com · https://developers.cloudflare.com

19. Singapore Airlines elevates travel & work with OpenAI technology

The airline uses the OpenAI API for customer-facing experiences and OpenAI models inside Jarvis, its governed internal AI platform for employees.

Evidence: The OpenAI News page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: openai.com · https://openai.com/index/singapore-airlines-travel-work

20. Gemini Intelligence: New features, on more devices

3 Here's a look at what's new.

Evidence: The blog.google release records now available for Google.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/products-and-platforms/platforms/android/gemini-intelligence-november-features-devices

21. Managed Agent server configuration reference

Default is what the packaged application.yml sets, or else the server's own default.

Evidence: The GitHub page documents the GitHub update.

Impact: Teams can evaluate the documented GitHub workflow before wider rollout.

Watch next: Watch the GitHub release for patch notes and rollout issues.

Source: qwenlm.github.io · https://qwenlm.github.io/qwen-code-docs/en/users/managed-agent-configuration-reference

22. Auditable Human-Agent Teams for Autonomous X-ray Experimentation

Agentic systems may lower this barrier, although sustained operation on physical instruments remains largely unexplored.

Evidence: The arXiv coding-agent research feed release records 2611.12933v1 for arXiv.

Impact: Teams can evaluate the documented arXiv workflow before wider rollout.

Watch next: Watch the arXiv release for patch notes and rollout issues.

Source: arxiv.org · https://arxiv.org/abs/2611.12933

23. 40 years of American culinary history with the James Beard Foundation

It uses AI to analyze ingredients across decades, letting you discover how dining habits have changed, from the explosion of kale in the 2000s to the decline of foie gras.

Evidence: More than just lists of dishes, the menus serve as cultural time capsules, revealing what diners valued at exact moments in history, how sourcing has evolved, and how regional and global influences have reshaped American dining.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/company-news/outreach-and-initiatives/arts-culture/james-beard-foundation

24. AWS: Amazon OpenSearch Service announces managed cross-Region disaster recovery

Managed disaster recovery delivers a recovery point objective (RPO) of under one minute and a recovery time objective (RTO) of under 20 minutes.

Evidence: AWS What's New incident amazon-opensearch-service-managed-cross-region-disaster-recovery is dated 2026-11-10.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: Watch AWS What's New for recovery confirmation and further AWS incidents.

Source: aws.amazon.com · https://aws.amazon.com/about-aws/whats-new/2026/11/amazon-opensearch-service-managed-cross-region-disaster-recovery/

25. Anysphere: Your agents can now coordinate with your teammates agents.

Your agents can now coordinate with your teammates' agents.

Evidence: The X @cursor_ai page documents the Anysphere update.

Impact: Teams can evaluate the documented Anysphere workflow before wider rollout.

Watch next: Watch the Anysphere release for patch notes and rollout issues.

Source: x.com · https://x.com/cursor_ai/status/2120295553309565139

26. OpenRouter: OpenRouter is officially part of stripe today!

OpenRouter is officially part of @stripe today!

Evidence: The source records 10 million.

Impact: Teams can evaluate the documented OpenRouter workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/OpenRouter/status/2120241577649909899

27. Schedule meetings in a single click from conversations in Google Chat

Attendees: Guests are filled in from the conversation, including people mentioned by name.

Evidence: The Google Workspace Updates page documents the Google update.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: workspaceupdates.googleblog.com · http://workspaceupdates.googleblog.com/2026/11/schedule-meetings-in-single-click-from-conversations-in-Google-Chat.html

28. Elevated errors on Fable 52 and Mythos 52

You'll receive email notifications when incidents are updated, and text message notifications whenever Claude creates or resolves an incident.

Evidence: The Anthropic Status release records 5.2 for Anthropic.

Impact: Teams can evaluate the documented Anthropic workflow before wider rollout.

Watch next: Watch Anthropic Status for recovery confirmation and further Anthropic incidents.

Source: status.claude.com · https://status.claude.com/incidents/pgz8r13pk4sm

29. Lilo: A Multi-Agent Conversational Sandbox for Children's Digital Communication

In Lilo, the child joins two AI-driven peers mid-argument, coached by a mentor character, also named Lilo, through a Stop-Think-Act traffic light.

Evidence: The arXiv Coding-Agent Research page documents the arXiv update.

Impact: Teams can evaluate the documented arXiv workflow before wider rollout.

Watch next: Watch the arXiv release for patch notes and rollout issues.

Source: arxiv.org · https://arxiv.org/abs/2611.14260v1

30. AWS: Amazon Bedrock tokenomics data lake

You can see the aggregate bill, but you can't see what happened inside each call.

Evidence: The AWS Machine Learning Blog page documents the AWS update.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: watch availability, limits, and real usage for AWS.

Source: aws.amazon.com · https://aws.amazon.com/blogs/machine-learning/amazon-bedrock-tokenomics-data-lake/

31. Google: Pixel 10 with Gemini Intelligence, custom widgets, and more in our November Pixel Drop

Use Pixel 10 with Gemini Intelligence Gemini Intelligence is now available on Pixel 10 devices, bringing new capabilities like Rambler, personalized suggestions, and taking care of multi-step tasks - like placing your morning coffee order.

Evidence: The Google Blog All Topics page documents the Google update.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/products-and-platforms/devices/pixel/november-2026-pixel-drop/

32. Release v1.0.0-preview

Qwen Code 1.0 Preview is now available.

Evidence: The Qwen Code Releases release records v1.0.0 for Qwen Code.

Impact: Teams can evaluate the documented Qwen Code workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.com · https://github.com/QwenLM/qwen-code/releases/tag/v1.0.0-preview

Source: github.com · https://github.com/QwenLM/qwen-code/releases/tag/v0.27.2

33. AI is becoming a technology that will shape the future of national security

AI is becoming a technology that will shape the future of national security.

Evidence: The Sakana AI page documents the Sakana AI update.

Impact: Teams can evaluate the documented Sakana AI workflow before wider rollout.

Watch next: watch security notes, rollout controls.

Source: sakana.ai · https://sakana.ai/michael-tom

34. FileChanged hooks

See the Hooks guide for hook configuration, executors, and trust rules.

Evidence: The GitHub page documents the GitHub update.

Impact: Teams can evaluate the documented GitHub workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: qwenlm.github.io · https://qwenlm.github.io/qwen-code-docs/en/users/features/file-changed-hooks

35. Tibo Sottiaux (OpenAI): Perhaps also a good time for a banked reset.

Perhaps also a good time for a banked reset.

Evidence: The X @thsottiaux page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/thsottiaux/status/2120410480204525936

36. LangChain: How Workday Built an Enterprise-Scale AI Agent Platform with LangGraph and LangSmith

The team leveraged LangGraph for agent orchestration and LangSmith for tracing, observability, and evals.

Evidence: The LangChain Blog page documents the LangChain update.

Impact: Teams can evaluate the documented LangChain workflow before wider rollout.

Watch next: Watch the LangChain release for patch notes and rollout issues.

Source: www.langchain.com · https://www.langchain.com/blog/how-workday-built-an-enterprise-scale-ai-agent-platform-with-langgraph-and-langsmith

37. Different Workflows, One Transformation: How Microsoft Indonesia Employees are Putting AI to Work

From financial forecasting and customer engagements to policy research and AI training, Microsoft employees in Indonesia are finding new ways to work with AI, and more time to focus on what matters.

Evidence: The Microsoft Source Asia page documents the Microsoft update.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: Watch the Microsoft release for patch notes and rollout issues.

Source: news.microsoft.com · https://news.microsoft.com/source/asia/2026/11/10/different-workflows-one-transformation-how-microsoft-indonesia-employees-are-putting-ai-to-work

38. OpenCode publishes v2.2.7

On a Location that is still loading plugins, agent.list returns the agents loaded so far, and integration.list, usage.limits, vcs.init, rpc.call and artifact.* no longer wait up to 5 seconds.

Evidence: The OpenCode release records v2.2.7 for OpenCode.

Impact: Teams can evaluate the documented OpenCode workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.com · https://github.com/anomalyco/opencode/releases/tag/v2.2.7

39. Anthropic Python SDK releases 2.8.0

The pypi registry records Anthropic Python SDK version 2.8.0.

Evidence: Review the linked changelog for breaking changes, model access, and developer impact.

Impact: Teams can evaluate the documented Anthropic workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: pypi.org · https://pypi.org/project/anthropic/2.8.0/

40. Anthropic TypeScript SDK releases 1.8.0

Review the linked changelog for breaking changes, model access, and developer impact.

Evidence: The NPM Anthropic TypeScript SDK release records 1.8.0 for Anthropic.

Impact: Teams can evaluate the documented Anthropic workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: www.npmjs.com · https://www.npmjs.com/package/@anthropic-ai/sdk/v/1.8.0

41. OpenAI: Now in beta: Businesses in ChatGPT.

Claim your business, manage your information, and get insights on how people engage with you.

Evidence: The X @OpenAI page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/OpenAI/status/2120216592395174382

Source: openai.com · https://openai.com/index/introducing-businesses-chatgpt/

42. OpenAI: Now, you can use your ChatGPT Business plan in tools like NotionHQ, v0, ampcode, kilocode, warpdotdev, Hermes from NousResearch, op...

Connect with Sign in with ChatGPT to get started.

Evidence: The X @OpenAIDevs page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/OpenAIDevs/status/2120212596850663712

43. GitHub App support for Enterprise Copilot seat management

The Copilot seat management APIs are accessible with a new enterprise fine-grained permission for Apps: Enterprise Copilot license management.

Evidence: The GitHub Changelog page documents the GitHub Copilot update.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.blog · https://github.blog/changelog/2026-11-10-github-app-support-for-enterprise-copilot-seat-management

44. Aperture skill sharing: one home for every agent skill on your team

However, these skills are typically attached to individual users and specific agents.

Evidence: The Tailscale Blog page documents the Tailscale update.

Impact: Teams can evaluate the documented Tailscale workflow before wider rollout.

Watch next: Watch the Tailscale release for patch notes and rollout issues.

Source: tailscale.com · https://tailscale.com/blog/skill-sharing-with-aperture

45. Expanding Gemini in Gmail to more Google Workspace users

Managing an overflowing inbox and composing refined replies can be a significant hurdle for educators, students, and professionals.

Evidence: The Google Workspace Updates page documents the Google update.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: workspaceupdates.googleblog.com · http://workspaceupdates.googleblog.com/2026/11/expanding-gemini-in-gmail-to-more-Google-Workspace-users.html

46. Introducing Businesses in ChatGPT

Together, these products create more ways for businesses to connect with people as they explore options and make decisions.

Evidence: The OpenAI News page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: openai.com · https://openai.com/index/introducing-businesses-chatgpt

47. OpenAI: With the runwayml plugin in Codex and ChatGPT, you can see how a character from your prototype moves, try a different opening shot...

Anthony Maggio shares how Runway's marketing team is using ChatGPT Image to produce more assets each week.

Evidence: The X @OpenAIDevs page documents the Codex update.

Impact: Teams can evaluate the documented Codex workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/OpenAIDevs/status/2120258357533749755

48. OpenAI: Were retiring Advanced and Standard voice from ChatGPT Voice on December 11, 2026.

Since then, voice usage has nearly doubled, and virtually all people using Posted 2026-11-10.

Evidence: The X @OpenAINewsroom page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/OpenAINewsroom/status/2120277245713654201

49. MiniMax H3-Image: Bringing 4K Image Generation into the 10-Second Era

Today, MiniMax is releasing MiniMax H3-Image, an open-weight image generation model built on H3.

Evidence: It supports text-to-image generation, reference-based generation, and image editing.

Impact: Teams can evaluate the documented MiniMax workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: www.minimax.io · https://www.minimax.io/blog/minimax-h3-image

50. Running AV Reasoning Models Within Onboard Compute and Latency Limits

NVIDIA Alpamayo 2 Edge addresses this need with an adaptive reasoning vision-language-action (VLA) model designed for real-time operation on NVIDIA DRIVE AGX Thor.

Evidence: The NVIDIA AI Blog page documents the NVIDIA update.

Impact: Teams can evaluate the documented NVIDIA workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: developer.nvidia.com · https://developer.nvidia.com/blog/running-av-reasoning-models-within-onboard-compute-and-latency-limits/

51. arXiv: Comparative Analysis of Agent Evaluation Frameworks: Stability, Detection, and Discovery in Enterprise Analytics Agents

Deploying LLM-based analytics agents in enterprise settings requires evaluation frameworks that can reliably detect failures across complex, multi-tool workflows.

Evidence: The arXiv Language-Model Research page documents the arXiv update.

Impact: Teams can evaluate the documented arXiv workflow before wider rollout.

Watch next: Watch the arXiv release for patch notes and rollout issues.

Source: arxiv.org · https://arxiv.org/abs/2611.14493v1

52. arXiv: Don't Just Trust Your Memory: Evidence-Linked Memory Reduces Memory-Induced Degradation in LLM Agents

External memory enables LLM agents to improve from experience by distilling trajectories of past tasks into concise lessons for new tasks.

Evidence: The arXiv Coding-Agent Research page documents the arXiv update.

Impact: Teams can evaluate the documented arXiv workflow before wider rollout.

Watch next: Watch the arXiv release for patch notes and rollout issues.

Source: arxiv.org · https://arxiv.org/abs/2611.14320v1

53. BotPsy: On-Device Personal Assistant with a Sub-Billion-Parameter Agentic Language Model

Furthermore, proprietary models offer limited customization for specific workflows, while posing risks to privacy, data control, and transparency.

Evidence: The source records 44.0 / 23.4.

Impact: Teams can evaluate the documented qvac workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: huggingface.co · https://huggingface.co/blog/qvac/botpsy

54. Microsoft Research: Lazare, veni foras: Reprogramming Dormant Neurons to Backdoor AI Agents

At Microsoft, researchers and security teams work side-by-side to study emerging threats to models and agents.

Evidence: The Microsoft Research Blog page documents the Microsoft Research update.

Impact: Teams can evaluate the documented Microsoft Research workflow before wider rollout.

Watch next: Watch the Microsoft Research release for patch notes and rollout issues.

Source: www.microsoft.com · https://www.microsoft.com/en-us/research/blog/lazare-veni-foras-reprogramming-dormant-neurons-to-backdoor-ai-agents/

55. Mitra-v2: Scaling synthetic pretraining for tabular foundation models

The standard tools for this job, such as gradient-boosted decision trees, produce models tailored to specific tables.

Evidence: The Reference discovery page documents the Amazon update.

Impact: Teams can evaluate the documented Amazon workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: www.amazon.science · https://www.amazon.science/blog/mitra-v2-scaling-synthetic-pretraining-for-tabular-foundation-models

56. arXiv: When Should Agents Remember? Falsification-Gated Self-Evolution for LLM Agents

This paper addresses the core question of when an experience-derived behavioral update should be admitted into persistent agent state.

Evidence: The arXiv Coding-Agent Research page documents the arXiv update.

Impact: Teams can evaluate the documented arXiv workflow before wider rollout.

Watch next: Watch the arXiv release for patch notes and rollout issues.

Source: arxiv.org · https://arxiv.org/abs/2611.14326v1

57. arXiv: AI Isn't Getting Dumber, We're Getting Pickier: Rising Standards in Human Evaluation of Large Language Models

Users often complain that AI assistants such as ChatGPT are getting worse.

Evidence: The arXiv Language-Model Research page documents the arXiv update.

Impact: Teams can evaluate the documented arXiv workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: arxiv.org · https://arxiv.org/abs/2611.14333v1

58. arXiv: Evaluating LLM-Generated World Models for Neuro-Symbolic Reasoning

Formal world models can support planning, verification, and safety reasoning, but constructing them from open-ended natural-language situations is difficult, particularly in multi-agent settings where several formalizations may be plausible.

Evidence: The arXiv Coding-Agent Research page documents the arXiv update.

Impact: Teams can evaluate the documented arXiv workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: arxiv.org · https://arxiv.org/abs/2611.14419v1

59. Anthropic: We've given all Pro, Max, Ultra, and Team users one free full reset, across all models and limits.

ClaudeDevs has given all Pro, Max, Ultra, and Team users one free full reset, across all models and limits.

Evidence: The X @ClaudeDevs page documents the Anthropic update.

Impact: Teams can evaluate the documented Anthropic workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: x.com · https://x.com/ClaudeDevs/status/2120275296637321476

60. Contrastive Discovery: Open-Ended Scientific Discovery over Competing Explanations

LLM agents are increasingly used for open ended, data driven scientific discovery, yet most of them evaluate hypotheses pointwise, testing an empirical claim h only against its complement $\neg h$.

Evidence: The arXiv Language-Model Research page documents the arXiv update.

Impact: Teams can evaluate the documented arXiv workflow before wider rollout.

Watch next: watch availability, limits, and real usage for arXiv.

Source: arxiv.org · https://arxiv.org/abs/2611.14514v1

61. Stripe: Together with OpenRouter, well help businesses explore new models and optimize token routing and usage.

Stripe is building the economic infrastructure for AI.

Evidence: The X @stripe page documents the Stripe update.

Impact: Teams can evaluate the documented Stripe workflow before wider rollout.

Watch next: watch pricing, quota, and account limits for Stripe.

Source: x.com · https://x.com/stripe/status/2120240651778355306

62. AWS: Build a daily dependency watcher with LangGraph and Amazon Bedrock AgentCore web search

A model's training data can't answer those questions, so agents need web search.

Evidence: The AWS Machine Learning Blog page documents the AWS update.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: Watch the AWS release for patch notes and rollout issues.

Source: aws.amazon.com · https://aws.amazon.com/blogs/machine-learning/build-a-daily-dependency-watcher-with-langgraph-and-amazon-bedrock-agentcore-web-search/

63. arXiv: A Cross-Scenario Survey and Analysis of Self-Evolving Multimodal Agents

Recent work shows that multimodal agents increasingly self-improve without recurring human annotation.

Evidence: The arXiv Coding-Agent Research page documents the arXiv update.

Impact: Teams can evaluate the documented arXiv workflow before wider rollout.

Watch next: Watch the arXiv release for patch notes and rollout issues.

UNVERIFIED supplemental report

Non-official information. Unverified report. Reuters reports: OpenAI lets businesses claim ChatGPT profiles, adds AI agents for US e-commerce firms. The claim from Reuters is not independently confirmed. Confirmation to watch for the Reuters report: A first-party page from OpenAI that states it.

Attributed source: https://www.reuters.com/technology/openai-lets-businesses-claim-chatgpt-profiles-adds-ai-agents-us-e-commerce-firms-2026-11-10

UNVERIFIED supplemental report

Non-official information. Unverified report. The Verge reports: ChatGPT is getting verified AI 'Business Agents'. The claim from The Verge is not independently confirmed. Confirmation to watch for the The Verge report: A first-party page from OpenAI that states it.

Attributed source: https://www.theverge.com/ai-artificial-intelligence/1030552/openai-chatgpt-business-agents-hub

Finance Daily

3 source-linked editorial stories.

1. CPI for all items increases 0.4% in October; shelter rises

BLS Consumer Price Index reports: CPI for all items increases 0.4% in October; shelter rises.

Evidence: BLS Consumer Price Index reports: In October, the Consumer Price Index for All Urban Consumers rose 0.4 percent, seasonally adjusted (SA).

Impact: The index for all items less food and energy rose 0.3 percent in October (SA).

Limits: Next official filing or company update

Watch next: Watch the next official inflation release, the central-bank response, and equity breadth.

Source: www.bls.gov · https://www.bls.gov/news.release/archives/cpi_11102026.htm

2. Bitcoin down 0.9% at $73,860 on CoinGecko data

Bitcoin down 0.9% at $73,860 on CoinGecko data.

Evidence: Bitcoin started the 24-hour window at $74,566, according to CoinGecko.

Impact: CoinGecko price data show Bitcoin at $73,860, down 0.9% from $74,566 over the past 24 hours.

Limits: Bitcoin down 0.9% at $73,860: firmer rates or sticky inflation could reverse the liquidity and equity-risk read

Watch next: Watch whether Bitcoin and Ether extend or reverse these moves as Wall Street opens, and how the dollar and Treasury yields respond.

Source: api.coingecko.com · https://api.coingecko.com/api/v3/coins/bitcoin/market_chart/range?vs_currency=usd&from=1794294000&to=1794380399

3. Ether down 2.2% at $2,069 on CoinGecko data

Ether down 2.2% at $2,069 on CoinGecko data.

Evidence: Ether started the 24-hour window at $2,115, according to CoinGecko.

Impact: CoinGecko price data show Ether at $2,069, down 2.2% from $2,115 over the past 24 hours.

Limits: Ether down 2.2% at $2,069: firmer rates or sticky inflation could reverse the liquidity and equity-risk read

Watch next: Watch whether Bitcoin and Ether extend or reverse these moves as Wall Street opens, and how the dollar and Treasury yields respond.

Source: api.coingecko.com · https://api.coingecko.com/api/v3/coins/ethereum/market_chart/range?vs_currency=usd&from=1794294000&to=1794380399

AI Daily

This is AI Daily. Here are the key changes and primary source details.

Put Gemini 4 Carbon to work with Working with a single agent works well for scoped tasks, but breaks down when a change spans dozens of files and test suites. Dynamic subagents evolved that into a primary agent spinning off isolated helper agents: powerful for delegating one-off tasks, but still bottlenecked by a single coordinator context reviewing, synthesizing, and routing every step.

Introducing the Multimodal Knowledge Agent benchmark. Yet, everyday professional work looks very different.

Kubernetes, the open source system that manages how applications run across thousands of AI factories, has become the foundation for AI, and the demands on it are only growing.

Google Cloud launches Gemini for healthcare. Google Cloud has announced Gemini for healthcare, an AI solution engineered to unify fragmented clinical, operational, and administrative systems. Moving beyond simple information retrieval, it enables healthcare teams to turn siloed data into coordinated action.

Cursor Projects is multiplayer. Today Projects gets a major upgrade: it's now multiplayer.

A W S: Autonomous treasury agents. In 2023, Trovata launched the first generative AI built specifically for treasury.

Anthropic: Rolling out on web and desktop. Also new: with interactive connectors, you can now open the full version of a tool inside Claude.

OpenAI: We're turning our lessons from defending OpenAI. OpenAI is turning its lessons from defending OpenAI into practical tools for its customers.

Agent Substrate: Advancing Kubernetes for Agents at Scale. It multiplexes many sessions over a small pool of worker Pods.

ReTrace: Distilling Tool-Using Agents into Planner-Free Workflows. Business process automation runs the same Standard Operating Procedure (SOP) again and again on new inputs.

Anthropic: Anthropic has launched the roadshow. These securities may not be sold, nor may.

Incorrect cost data in Costs API exports Resolved All affected services are operating normally again.

Start and Restore GPU Workloads in Seconds. When inference demand spikes or a replica fails, available GPUs don’t translate immediately into serving capacity.

Powered by the new AMD “Zen 6” architecture, 6 th Gen EPYC CPUs deliver a broad portfolio of workload-optimized server CPUs spanning agentic AI, enterprise, cloud computing, HPC and general-purpose computing.

C++ language server auto-configures MSBuild builds. The Microsoft C++ Language Server for GitHub Copilot CLI now bundles its MSBuild compile commands extractor and invokes it automatically.

A W S introduces Kimi K 3.1 Pro on Amazon Bedrock. According to Moonshot AI, that extra training targets long-horizon agentic work and fewer factual errors.

Amazon Bedrock adds bedrock-runtime endpoint support for Daybreak models. Daybreak Red is designed for advanced, authorized tasks such as vulnerability research, exploit reproduction, and mitigation development.

Cloudflare: Harnesses. Most people building new agents should start with the Pi harness .

Singapore Airlines elevates travel & work with OpenAI technology. The airline uses the OpenAI API for customer-facing experiences and OpenAI models inside Jarvis, its governed internal AI platform for employees.

Gemini Intelligence: New features, on more devices. 3 Here’s a look at what’s new.

Managed Agent server configuration reference. Default is what the packaged application.yml sets, or else the server’s own default.

Auditable Human-Agent Teams for Autonomous X-ray Experimentation. Agentic systems may lower this barrier, although sustained operation on physical instruments remains largely unexplored.

It uses AI to analyze ingredients across decades, letting you discover how dining habits have changed, from the explosion of kale in the 2000s to the decline of foie gras. More than just lists of dishes, the menus serve as cultural time capsules, revealing what diners valued at exact moments in history, how sourcing has evolved, and how regional and global influences have reshaped American dining.

A W S: Amazon OpenSearch Service announces managed cross-Region disaster recovery. Managed disaster recovery delivers a recovery point objective (RPO) of under one minute and a recovery time objective (RTO) of under 20 minutes.

Anysphere: Your agents can coordinate with your teammates agents. Your agents can now coordinate with your teammates’ agents.

OpenRouter is officially part of @stripe today!

Schedule meetings in a single click from conversations. Attendees: Guests are filled in from the conversation, including people mentioned by name.

Elevated errors on Fable 52 and Mythos 52. You'll receive email notifications when incidents are updated, and text message notifications whenever Claude creates or resolves an incident.

Lilo: A Multi-Agent Conversational Sandbox for Children's Digital Communication. In Lilo, the child joins two AI-driven peers mid-argument, coached by a mentor character, also named Lilo, through a Stop-Think-Act traffic light.

A W S: Amazon Bedrock tokenomics data lake. You can see the aggregate bill, but you can’t see what happened inside each call.

Use Pixel 10 with Gemini Intelligence Gemini Intelligence is now available on Pixel 10 devices, bringing new capabilities like Rambler, personalized suggestions, and taking care of multi-step tasks — like placing your morning coffee order.

Release publishes v1.0.0-preview official release notes. Qwen Code 1.0 Preview is now available.

AI is becoming a technology that will shape the future of national security.

FileChanged hooks. See the Hooks guide for hook configuration, executors, and trust rules.

Tibo of OpenAI: Perhaps also a good time. Perhaps also a good time for a banked reset.

LangChain: How Workday Built an Enterprise-Scale AI Agent Platform. The team leveraged LangGraph for agent orchestration and LangSmith for tracing, observability, and evals.

From financial forecasting and customer engagements to policy research and AI training, Microsoft employees in Indonesia are finding new ways to work with AI, and more time to focus on what matters.

On a Location that is still loading plugins, agent.list returns the agents loaded so far, and integration.list, usage.limits, vcs.init, rpc.call and artifact.* no longer wait up to 5 seconds.

Anthropic Python SDK releases publishes version 2 point 8 point 0 official release notes. The pypi registry records Anthropic Python SDK version 2 point 8 point 0.

Anthropic TypeScript SDK releases publishes version 1 point 8 point 0 official release notes. Review the linked changelog for breaking changes, model access, and developer impact.

OpenAI: in beta: Businesses in ChatGPT. Claim your business, manage your information, and get insights on how people engage with you.

OpenAI: Now, you can use your ChatGPT Business plan. Connect with Sign in with ChatGPT to get started.

GitHub App support for Enterprise Copilot seat management. The Copilot seat management APIs are accessible with a new enterprise fine-grained permission for Apps: Enterprise Copilot license management.

Aperture skill sharing: one home for every agent skill. However, these skills are typically attached to individual users and specific agents.

Expanding Gemini in Gmail to more Google Workspace users. Managing an overflowing inbox and composing refined replies can be a significant hurdle for educators, students, and professionals.

Introducing Businesses in ChatGPT. Together, these products create more ways for businesses to connect with people as they explore options and make decisions.

OpenAI: With the runwayml plugin in Codex and ChatGPT. Anthony Maggio shares how Runway’s marketing team is using ChatGPT Image to produce more assets each week.

OpenAI: Were retiring Advanced and Standard voice. Since then, voice usage has nearly doubled, and virtually all people using.

MiniMax H3-Image: Bringing 4K Image Generation. Today, MiniMax is releasing MiniMax H3-Image, an open-weight image generation model built on H 3. It supports text-to-image generation, reference-based generation, and image editing.

Running AV Reasoning Models Within Onboard Compute. NVIDIA Alpamayo 2 Edge addresses this need with an adaptive reasoning vision-language-action (VLA) model designed for real-time operation on NVIDIA DRIVE AGX Thor.

ArXiv: Comparative Analysis of Agent Evaluation Frameworks: Stability, Detection. Deploying LLM-based analytics agents in enterprise settings requires evaluation frameworks that can reliably detect failures across complex, multi-tool workflows.

ArXiv: Don't Just Trust Your Memory. External memory enables LLM agents to improve from experience by distilling trajectories of past tasks into concise lessons for new tasks.

BotPsy: On-Device Personal Assistant. Furthermore, proprietary models offer limited customization for specific workflows, while posing risks to privacy, data control, and transparency.

Microsoft Research: Lazare, veni foras: Reprogramming Dormant Neurons. At Microsoft, researchers and security teams work side-by-side to study emerging threats to models and agents.

Mitra-v2: Scaling synthetic pretraining for tabular foundation models. The standard tools for this job, such as gradient-boosted decision trees, produce models tailored to specific tables.

ArXiv: When Should Agents Remember? Falsification-Gated Self-Evolution. This paper addresses the core question of when an experience-derived behavioral update should be admitted into persistent agent state.

ArXiv: AI Isn't Getting Dumber, We're Getting Pickier. Users often complain that AI assistants such as ChatGPT are getting worse.

Formal world models can support planning, verification, and safety reasoning, but constructing them from open-ended natural-language situations is difficult, particularly in multi-agent settings where several formalizations may be plausible.

Anthropic: We've given all Pro, Max, Ultra. ClaudeDevs has given all Pro, Max, Ultra, and Team users one free full reset, across all models and limits.

LLM agents are increasingly used for open ended, data driven scientific discovery, yet most of them evaluate hypotheses pointwise, testing an empirical claim h only against its complement $\neg h$.

Stripe: Together with OpenRouter. Stripe is building the economic infrastructure for AI.

A W S: Build a daily dependency watcher with LangGraph. A model’s training data can’t answer those questions, so agents need web search.

ArXiv: A Cross-Scenario Survey. Recent work shows that multimodal agents increasingly self-improve without recurring human annotation.

Non-official information. Unverified report. Reuters reports: OpenAI lets businesses claim ChatGPT profiles, adds AI agents for US e-commerce firms. The claim from Reuters is not independently confirmed. Confirmation to watch for the Reuters report: An official OpenAI announcement that states it.

Non-official information. Unverified report. The Verge reports: ChatGPT is getting verified AI 'Business Agents'. The claim from The Verge is not independently confirmed. Confirmation to watch for the Verge report: An official OpenAI announcement that states it.

Review official release notes for rollout, pricing, limits, and compatibility.

On the Artificial Analysis Intelligence Index, Claude Fable 5.2 from Anthropic leads the overall model ranking with a score of 64.6. Gemini 4 Carbon is second at 60.0 and Claude Opus 5.5 is third at 59.1. Claude Fable 5.2 is new on this board at number 1, as of November 10, 2026.

Finance Daily

Finance Daily for November 11, 2026. Today's stories include BLS, Bitcoin and Ether, with primary sources linked below.

CPI for all items increases 0.4% in October; shelter rises. The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.4 percent on a seasonally adjusted basis in October after rising 0.6 percent in September, the U.S. Bureau of Labor Statistics reported today.

Bitcoin down 0.9% at $73,860 on CoinGecko data. Bitcoin started the 24-hour window at $74,566, according to CoinGecko. The CoinGecko Bitcoin price series in US dollars is linked below. Watch whether Bitcoin and Ether extend or reverse these moves as Wall Street opens, and how the dollar and Treasury yields respond.

Ether down 2.2% at $2,069 on CoinGecko data. Ether started the 24-hour window at $2,115, according to CoinGecko. The CoinGecko Ether price series in US dollars is linked below.

Watch the next official inflation release, the central-bank response, and equity breadth. Next official filing or company update.
