AI Daily

22 source-linked editorial stories.

1. Google: Browser use has been rolling out in Antigravity, closing the loop between researching, writing code, and verifying it live.

Browser use has been rolling out in Antigravity, closing the loop between researching, writing code, and verifying it live.

Evidence: You choose what to log into, downloads pause until you approve them, and the agent can use the browser to run multiple tasks at once. Give it a try today.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/antigravity/status/2120556423474028576

Source: antigravity.google · https://antigravity.google/docs/browser

2. Gemini Decisions API: Fast, calibrated multimodal decisions

Evaluate up to 1,000 yes/no, choice, and rubric-scoring questions in a fast, single pass across text, images, audio, video, and PDFs.

Evidence: Your browser does not support the audio element.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: blog.google · https://blog.google/innovation-and-ai/technology/developers-tools/gemini-decisions-api

3. Google Cloud leaders share what to expect in cybersecurity for 2027.

As enterprise software shifts from static applications to autonomous agents managing core operations, cybersecurity is facing a fundamental transformation.

Evidence: In its Security 2027 analysis, leaders from across Google, Google Cloud, and Mandiant break down the critical trends shaping the next era of defense.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch security notes, rollout controls.

Source: blog.google · https://blog.google/innovation-and-ai/infrastructure-and-cloud/google-cloud/cybersecurity-2027

4. Google: Gemini on Apple CarPlay is rolling out globally starting today to all Gemini users on iOS across every supported Gemini Live langua...

Gemini on Apple CarPlay is rolling out globally starting today to all Gemini users on iOS across every supported Gemini Live language.

Evidence: Check out its blog to learn more about Gemini on Carplay and ways to make the most of your drive.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/GeminiApp/status/2120626272724484605

Source: goo.gle · https://goo.gle/GeminiOnCarplay

5. Google: Publish a Sheets canvas as a standalone link

Google: Publish a Sheets canvas as a standalone link.

Evidence: The Google Workspace Updates page documents the Google update.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: workspaceupdates.googleblog.com · http://workspaceupdates.googleblog.com/2026/11/publish-sheets-canvas-as-standalone-link.html

6. Get certified as a Google Cloud Professional Agentic Architect.

Over the past four months, Google Cloud has trained thousands of Google Cloud forward deployed engineers and Google Cloud partners on this advanced curriculum.

Evidence: This certification is now available for technical professionals like developers, cloud architects, and engineers who architect, build, and deploy agents on Google Cloud.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: Watch the Google release for patch notes and rollout issues.

Source: blog.google · https://blog.google/innovation-and-ai/infrastructure-and-cloud/google-cloud/professional-agentic-architect/

7. Issue types and fields are available for personal accounts

Issue types and issue fields are now generally available on repositories owned by personal accounts.

Evidence: This brings the same planning capabilities to individual developers and open source maintainers to standardize your workflows and organize issues across repositories.

Impact: Teams can evaluate the documented GitHub workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.blog · https://github.blog/changelog/2026-11-11-issue-types-and-fields-are-available-for-personal-accounts

8. OpenRouter: The Extractions API is now live in alpha on OpenRouter.

The Extractions API is now live in alpha on OpenRouter.

Evidence: Use it to pull specific details out of text, images, and PDFs by describing the fields you need, like the names in an email or the total on a receipt, and get each one back as structured data.

Impact: Teams can evaluate the documented OpenRouter workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: x.com · https://x.com/OpenRouter/status/2120542766191276199

9. JetBrains IDEs Transformed for the Agentic Era of Development

This allows you to bring your coding agents into your existing development environment, with one place to track their progress, review their changes, and send feedback.

Evidence: It is a major step in making JetBrains IDEs more agentic, while still respecting classical workflows, where the developer remains in control and at the center of everything.

Impact: Teams can evaluate the documented JetBrains workflow before wider rollout.

Watch next: Watch the JetBrains release for patch notes and rollout issues.

Source: blog.jetbrains.com · https://blog.jetbrains.com/ai/2026/11/air-in-jetbrains-ides-ga/

10. LangChain: How our GTM Agent builds consistent, high-quality sales artifacts

Because GTM Agent also knows where each deal stands, it can suggest the right document before a customer call.

Evidence: Deals where a rep sent one of these documents to the customer moved to a later stage 47% of the time, compared with 16% for matched deals without one.

Impact: Teams can evaluate the documented LangChain workflow before wider rollout.

Watch next: Watch the LangChain release for patch notes and rollout issues.

Source: www.langchain.com · https://www.langchain.com/blog/gtm-agent-high-quality-sales-artifacts

11. LangChain releases 1.5.0

The pypi registry records LangChain version 1.5.0.

Evidence: Review the linked changelog for breaking changes, model access, and developer impact.

Impact: Teams can evaluate the documented LangChain workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: pypi.org · https://pypi.org/project/langchain/1.5.0/

12. OpenAI: Finances is available to Free, Go, Plus and Pro users

Finances is available to Free, Go, Plus and Pro users in the U.S.

Evidence: Cha-ching Finances are now in the desktop app. Find ways to save, understand your spending, and make sense of your investments. You can also build custom financial tools.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/ChatGPT/status/2120604108893896965

13. OpenAI: Supporting research on AI and children's safety

OpenAI pledges $2 million as part of a global effort to better understand AI's impact on children and support their safety and wellbeing.

Evidence: The OpenAI News release records $2 million for OpenAI.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch security notes, rollout controls.

Source: openai.com · https://openai.com/index/children-first-declaration

14. Elevated errors affecting logins, sign-ups, and ChatGPT features

Elevated errors affecting logins, sign-ups, and ChatGPT features - OpenAI Status Subscribe to updates Powered by Availability metrics are reported at an aggregate level across all tiers, models and error types.

Evidence: Individual customer availability may vary depending on their subscription tier as well as the specific model and API features in use.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: Watch OpenAI Status for recovery confirmation and further OpenAI incidents.

Source: status.openai.com · https://status.openai.com//incidents/01M765MJQK7F85SC82RMTYN0V3

15. Runway Praxis-1 Is Now Available: Open-Weight Robotics Model

We introduced Praxis-1 in September as our first world action model, built on the same large-scale video pretraining behind our general world models.

Evidence: Our launch partners including Noble Machines, Standard Bots and Ultra have been running it on their own hardware: a legged humanoid, a six-axis industrial arm and a dual-arm warehouse robot.

Impact: Teams can evaluate the documented Runway workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: runway.com · https://runway.com/news/company-news/praxis-1-is-now-available

16. Microsoft: Content Understanding adds GPT-5.6, GPT-6, and GPT-6.1: Choose the right model for your workload

Azure Content Understanding now supports the GPT-5.6, GPT-6, and GPT-6.1 model families, giving you more choices for document, text, speech, and video workflows.

Evidence: This adds to the existing set of supported models like the GPT-5 series.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: devblogs.microsoft.com · https://devblogs.microsoft.com/foundry/content-understanding-adds-gpt-5-6-gpt-6-and-gpt-6-1-choose-the-right-model-for-your-workload/

17. KPMG scale trusted enterprise AI in Thailand through Microsoft Copilot and Microsoft Agent 365

KPMG in Thailand is strengthening its capabilities to help Thai organizations move from AI experimentation to enterprise-scale adoptionas part of the expanded global relationship between KPMG and Microsoft.

Evidence: The Microsoft Source Asia page documents the Microsoft update.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: Watch the Microsoft release for patch notes and rollout issues.

Source: news.microsoft.com · https://news.microsoft.com/source/asia/2026/11/12/kpmg-scale-trusted-enterprise-ai-in-thailand-through-microsoft-copilot-and-microsoft-agent-365/

18. KT 'Meisters' and Microsoft engineers build AI agents to spot network issues before customers do

SEOUL, Korea - As a network engineer, Heeyoung Oh's mission is to ensure that services for Korean telco KT's customers are not disrupted.

Evidence: If the network monitoring system flags a router issue in northern Seoul, she analyzes the situation and determines its cause, ideally in the first 10 minutes.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: Watch the Microsoft release for patch notes and rollout issues.

Source: news.microsoft.com · https://news.microsoft.com/source/features/digital-transformation/kt-meisters-and-microsoft-engineers-build-ai-agents-to-spot-network-issues-before-customers-do/

19. AWS: DeepSeek-V4-Pro, DeepSeek-V4-Flash, and DeepSeek-V4.1-Flash models now available on Amazon SageMaker JumpStart

AWS: DeepSeek-V4-Pro, DeepSeek-V4-Flash, and DeepSeek-V4.1-Flash models now available on Amazon SageMaker JumpStart.

Evidence: The AWS What's New release records V4.1 for AWS.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: Watch AWS What's New for recovery confirmation and further AWS incidents.

Source: aws.amazon.com · https://aws.amazon.com/about-aws/whats-new/2026/01/deepseek-v4-pro-v4-flash-v4.1-flash-on-sagemaker-jumpstart/

20. UAEF: A framework-agnostic system for closed-loop evaluation of AI agents

Each framework records agent execution in its own way, so the structure of messages, tool calls, and handoffs between agents differs from one to the next.

Evidence: Evaluation tooling tends to follow the same boundaries: teams build metrics, scoring logic, and result storage against a single framework's trace format, and they must rebuild them when they switch frameworks or run agents on more than one.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: Watch the AWS release for patch notes and rollout issues.

Source: aws.amazon.com · https://aws.amazon.com/blogs/machine-learning/uaef-a-framework-agnostic-system-for-closed-loop-evaluation-of-ai-agents/

21. Nature: Open foundation models for clinical AI

In order to address this challenge, Andrew Sellergren, Lin Yang, and colleagues introduce MedGemma, an open family of medical foundation models designed to support a broad spectrum of healthcare artificial intelligence (AI) applications.

Evidence: MedGemma includes multimodal models with 4B and 27B parameters, a text-only 27B parameter model, and MedSigLIP, a medical image encoder.

Impact: To be deployed in healthcare, models must adapt to local settings, integrate with clinical information systems, and support complex reasoning across heterogeneous patient data.

Watch next: watch docs, endpoint access, and developer limits.

22. windmill, from windmill-labs, gained 41 GitHub stars in a day

Engineers write code in 20+ languages and sync it with Git.

Evidence: The GitHub: windmill-labs/windmill release records v1.869.0 for windmill-labs.

Impact: Teams can evaluate the documented windmill-labs workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.com · https://github.com/windmill-labs/windmill

AI Daily

This is AI Daily. Today: antigravity rolls out browser use; and Runway Praxis-1 Is Now Available, Open-Weight Robotics Model.

Browser use has been rolling out in Antigravity, closing the loop between researching, writing code, and verifying it live. You choose what to log into, downloads pause until you approve them, and the agent can use the browser to run multiple tasks at once.

Gemini Decisions API: Fast, calibrated multimodal decisions. Evaluate up to 1,000 yes/no, choice, and rubric-scoring questions in a fast, single pass across text, images, audio, video, and PDFs. Your browser does not support the audio element.

Google Cloud leaders share what to expect in cybersecurity. As enterprise software shifts from static applications to autonomous agents managing core operations, cybersecurity is facing a fundamental transformation. In its Security 2027 analysis, leaders from across Google, Google Cloud, and Mandiant break down the critical trends shaping the next era of defense.

Gemini on Apple CarPlay is rolling out globally starting today to all Gemini users on iOS across every supported Gemini Live language. Check out its blog to learn more about Gemini on Carplay and ways to make the most of your drive.

Google: Publish a Sheets canvas as a standalone link.

Get certified as a Google Cloud Professional Agentic Architect. Over the past four months, Google Cloud has trained thousands of Google Cloud forward deployed engineers and Google Cloud partners on this advanced curriculum. This certification is now available for technical professionals like developers, cloud architects, and engineers who architect, build, and deploy agents on Google Cloud.

Issue types and fields are available for personal accounts. Issue types and issue fields are now generally available on repositories owned by personal accounts. This brings the same planning capabilities to individual developers and open source maintainers to standardize your workflows and organize issues across repositories.

The Extractions API is now live in alpha on OpenRouter. Use it to pull specific details out of text, images, and PDFs by describing the fields you need, like the names in an email or the total on a receipt, and get each one back as structured data.

This allows you to bring your coding agents into your existing development environment, with one place to track their progress, review their changes, and send feedback. It is a major step in making JetBrains IDEs more agentic, while still respecting classical workflows, where the developer remains in control and at the center of everything.

LangChain: How our GTM Agent builds consistent. Because GTM Agent also knows where each deal stands, it can suggest the right document before a customer call. Deals where a rep sent one of these documents to the customer moved to a later stage 47% of the time, compared with 16% for matched deals without one.

LangChain releases publishes version 1 point 5 point 0 official release notes. The pypi registry records LangChain version 1 point 5 point 0.

Finances is available to Free, Go, Plus and Pro users in the U.S. Cha-ching Finances are now in the desktop app. Find ways to save, understand your spending, and make sense of your investments. You can also build custom financial tools.

OpenAI: Supporting research on AI and children's safety. OpenAI pledges $2 million as part of a global effort to better understand AI’s impact on children and support their safety and wellbeing.

Elevated errors affecting logins, sign-ups, and ChatGPT features - OpenAI Status Subscribe to updates Powered by Availability metrics are reported at an aggregate level across all tiers, models and error types. Individual customer availability may vary depending on their subscription tier as well as the specific model and API features in use.

Runway introduced Praxis-1 in September as its first world action model, built on the same large-scale video pretraining behind its general world models. its launch partners including Noble Machines , Standard Bots and Ultra have been running it on their own hardware: a legged humanoid, a six-axis industrial arm and a dual-arm warehouse robot.

Azure Content Understanding now supports the GPT 5 point 6, GPT-6, and GPT 6 point 1 model families, giving you more choices for document, text, speech, and video workflows. This adds to the existing set of supported models like the GPT-5 series.

KPMG in Thailand is strengthening its capabilities to help Thai organizations move from AI experimentation to enterprise-scale adoptionas part of the expanded global relationship between KPMG and Microsoft.

KT 'Meisters' and Microsoft engineers build AI agents. SEOUL, Korea – As a network engineer, Heeyoung Oh’s mission is to ensure that services for Korean telco KT’s customers are not disrupted. If the network monitoring system flags a router issue in northern Seoul, she analyzes the situation and determines its cause, ideally in the first 10 minutes.

A W S: DeepSeek-V4-Pro, DeepSeek-V4-Flash, and DeepSeek-V4.1-Flash models available. A W S: DeepSeek-V4-Pro, DeepSeek-V4-Flash, and DeepSeek-V4.1-Flash models now available on Amazon SageMaker JumpStart.

UAEF: A framework-agnostic system. Each framework records agent execution in its own way, so the structure of messages, tool calls, and handoffs between agents differs from one to the next. Evaluation tooling tends to follow the same boundaries: teams build metrics, scoring logic, and result storage against a single framework’s trace format, and they must rebuild them when they switch frameworks or run agents on more than one.

Yet, strong performance on individual benchmarks does not automatically translate into useful clinical applications. In order to address this challenge, Andrew Sellergren, Lin Yang, and colleagues introduce MedGemma, an open family of medical foundation models designed to support a broad spectrum of healthcare artificial intelligence (AI) applications. MedGemma includes multimodal models with 4B and 27B parameters, a text-only 27B parameter model, and MedSigLIP, a medical image encoder.

Windmill, from windmill-labs, gained 41 GitHub stars. Engineers write code in 20+ languages and sync it with Git.

Non-official information. Unverified report. The Verge reports: Google's Tabletop AI experiment lets you build custom collaboration apps. The claim from The Verge is not independently confirmed. Confirmation to watch for the Verge report: A first-party page from Google that states it.
