AI Daily

30 source-linked editorial stories.

1. DeepSeek: The capabilities behind the DeepSeek App are now available through the DeepSeek API.

The capabilities behind the DeepSeek App are now available through the DeepSeek API.

Evidence: The full DeepSeek App experience, now via API. Search, files, links, safety, and voice. Enable built-in features with a few parameters, or call standalone APIs such as OCR, ASR, and TTS.

Impact: Teams can evaluate the documented DeepSeek workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: x.com · https://x.com/deepseek_ai/status/2121247896918253875

Source: api-docs.deepseek.com · https://api-docs.deepseek.com/news/news261113

2. Gemini 4 Hydrogen in GitHub Copilot

Gemini 4 Hydrogen, Google's latest Flash model, is now generally available in GitHub Copilot.

Evidence: It is designed for fast, efficient agentic coding, tool use, and multistep workflows, with improved instruction following over Gemini 3.8 Flash.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.blog · https://github.blog/changelog/2026-11-13-gemini-4-hydrogen-in-github-copilot

3. Claim your Google Cloud Credits in Google AI Studio

Google AI Pro and Ultra subscribers can set up billing, claim monthly credits, and start building with the Gemini API without leaving their workspace.

Evidence: The blog.google page documents the Google update.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/innovation-and-ai/technology/developers-tools/google-cloud-credits-gdp-ai-studio

4. Connect Google Wallet to Gemini for personal finance insights

Personal Intelligence in Gemini securely connects information from apps you already use - like Gmail, Photos, YouTube, and Search - to make your experience more personalized and helpful.

Evidence: Today, Google is adding Google Wallet to the list of connected apps so you can get more tailored responses around personal finance.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/innovation-and-ai/products/gemini-app/google-wallet-gemini-app

5. Adapting to AI penetration testing orchestrators: The Modern Security Model

Just a few weeks ago, ARTEX - an open source agentic penetration testing system that automates offensive security workflows - was the only framework available.

Evidence: In just the last three days, we have seen over 50 framework families attempt to scan Cloudflare customers globally.

Impact: Teams can evaluate the documented Cloudflare workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: blog.cloudflare.com · https://blog.cloudflare.com/adapting-to-ai-penetration-testing-orchestrators

6. Kitesurf is now open source

Kitesurf is open source on GitHub under the Apache 2.0 license.

Evidence: We introduced Kitesurf, our stateless browser for AI agents that runs entirely on top of Workers, in August and followed up in September with WebMCP support, new APIs, and improved compatibility.

Impact: Teams can evaluate the documented Cloudflare workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: blog.cloudflare.com · https://blog.cloudflare.com/kitesurf-open-source

7. Cloudflare: Kitesurf

Kitesurf is Cloudflare's stateless, highly scalable browser that runs entirely on top of Workers and is designed for AI agents.

Evidence: Instead of shipping a full desktop browser engine like Chromium, Kitesurf focuses on what matters to an agent - token count, context windows, scalability, performance, and cost - while trading away features that only humans need, such as tabs, themes, extensions, and pixel-perfect rendering.

Impact: Teams can evaluate the documented Cloudflare workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: developers.cloudflare.com · https://developers.cloudflare.com/browser-run/kitesurf

8. Token Pass now includes $150 in tokens for $30/month

Vercel Token Pass now includes $150 of tokens per month (up from $80) for the same $30 per team per month.

Evidence: The credit applies to featured open-weight models served through AI Gateway, including Kimi K3, Kimi K3.1 Pro, GLM 5.3, GLM 5.3 Flash, and DeepSeek V4.1 Flash.

Impact: Teams can evaluate the documented Vercel workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: vercel.com · https://vercel.com/changelog/vercel-token-pass-now-includes-one-hundred-fifty-dollars-of-monthly-tokens

9. Vercel: Available in fx with no extra setup

Use across the 5 models supported today Available in fx with no extra setup Posted 2026-11-13.

Evidence: Vercel Token Pass now offers $150 in tokens for $30 per month.

Impact: Teams can evaluate the documented Vercel workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

10. A subspecialty diagnostic system powered by self-supervised learning for cervical histopathology

Foundation models could be promising for cervical cancer screening, but have important limitations for their clinical deployment.

Evidence: Here, the authors introduce the Cervical Subspecialty Pathology (CerS-Path) diagnostic system, a self-supervised learning framework for cervical cancer pathology that outperforms state-of-the-art foundation models across multiple diagnostic tasks.

Impact: Teams can evaluate the documented Nature workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Elon Musk's SpaceX AI group has laid off roughly 60 employees working on Grok Imagine, leaving just a handful to maintain the product.

Evidence: The X @theinformation page documents the The Information update.

Impact: Teams can evaluate the documented The Information workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/theinformation/status/2121279457084244122

12. More Ways for Muse to Work With Businesses

The Personal Agent Protocol is designed to close that gap with an open standard for how personal agents work with businesses, whether through a website, APIs or direct conversations with their own agents.

Evidence: Muse is the first personal agent to support Poppy.

Impact: Teams can evaluate the documented Muse workflow before wider rollout.

Watch next: watch availability, limits, and real usage for Muse.

Source: muse.ai · https://muse.ai/blog/poppy-personal-agent-protocol

13. Releasing Personal Agent Protocol 1.0

Today Sierra is releasing version 1.0 of Personal Agent Protocol (Poppy).

Evidence: It's on for everyone who uses Muse, Meta's AI agent, enabled for every merchant on Shopify, and live with multiple design partners.

Impact: Teams can evaluate the documented Sierra workflow before wider rollout.

Watch next: Watch the Sierra release for patch notes and rollout issues.

Source: sierra.ai · https://sierra.ai/blog/releasing-poppy

14. Cognition: Introducing: Devin Apps

Introducing: Devin Apps Private, secure, sharable web applications running directly on Devin's cloud computer.

Evidence: Devin Apps are designed to power your most ambitious internal tools, preview deployments, and extensions to Devin itself.

Impact: Teams can evaluate the documented Cognition workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/cognition/status/2121255137914077300

15. Introducing ChatGPT Wallet

It's the first wallet that lets agents pay without access to users' actual card details and that requires a security check for every purchase, while also preserving existing card rewards and protections for eligible disputes.

Evidence: The OpenAI News page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: openai.com · https://openai.com/index/introducing-chatgpt-wallet

16. OpenAI: Now your dot can securely complete purchases on your behalfwith your approval.

Now your dot can securely complete purchases on your behalf-with your approval.

Evidence: With ChatGPT Wallet, agents pay without access to your actual card details.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/ChatGPT/status/2121283151729496235

17. Delayed Costs Data in the Compliance API

Delays in cost data are still expected.

Evidence: OpenAI Status incident 01M7ATRS6BMZ61E4JDHJGM79Y0 is dated 2026-11-14.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: Watch OpenAI Status for recovery confirmation and further OpenAI incidents.

Source: status.openai.com · https://status.openai.com//incidents/01M7ATRS6BMZ61E4JDHJGM79Y0

18. Shield helps technicians hand off legacy portal work with OpenAI

With OpenAI's GPT-6 Astra, Shield can now hand supported browser tasks to agents instead of leaving a technician to log in and finish them manually.

Evidence: The OpenAI News page documents the OpenAI update.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: openai.com · https://openai.com/business/customer-stories/shield

19. Elevated errors with ChatGPT billing and Ads billing

Elevated errors with ChatGPT billing and Ads billing - OpenAI Status Subscribe to updates Powered by Availability metrics are reported at an aggregate level across all tiers, models and error types.

Evidence: Individual customer availability may vary depending on their subscription tier as well as the specific model and API features in use.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: Watch OpenAI Status for recovery confirmation and further OpenAI incidents.

Source: status.openai.com · https://status.openai.com//incidents/01M7C40W0N5MZHNW0YM09QV962

Source: status.openai.com · https://status.openai.com//incidents/01M78GAT3AK9P9W8Z230KHFVE8

20. GitHub Enterprise Server support in the GitHub Copilot app

You can now bring your work on GitHub Enterprise Server (GHES) into the GitHub Copilot app.

Evidence: Add your GHES account to work with remote repositories, issues, and pull requests.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.blog · https://github.blog/changelog/2026-11-13-github-enterprise-server-support-in-the-github-copilot-app

21. Manage AI Scan for repositories using the REST API

This public preview adds a repository_scan setting to the existing AI Scan enablement endpoints.

Evidence: You can roll out AI Scan for repositories with scripts and infrastructure as code instead of changing settings one organization or repository at a time.

Impact: Teams can evaluate the documented GitHub workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: github.blog · https://github.blog/changelog/2026-11-13-manage-ai-scan-for-repositories-using-the-rest-api

22. Upcoming deprecation of selected GitHub Copilot models in December

The deprecation of Claude Haiku 4.5 does not apply to these customers.

Evidence: Under default model enablement, the suggested alternatives are automatically enabled for Copilot Enterprise and Copilot Business customers unless an administrator has turned off the global default or explicitly disabled the model.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: github.blog · https://github.blog/changelog/2026-11-13-upcoming-deprecation-of-selected-github-copilot-models-in-december

23. When One GPU Isn't Enough: Serving GLM-5.3 Across Two NVIDIA DGX Stations with vLLM

Running a frontier-scale model locally means keeping all its weights in GPU memory; the largest models no longer fit on one machine.

Evidence: Two NVIDIA DGX Stations connected over ConnectX-8 RDMA serve one model through a single endpoint, with tensor parallelism splitting the model weights and computation across both GPUs.

Impact: Teams can evaluate the documented NVIDIA workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: developer.nvidia.com · https://developer.nvidia.com/blog/when-one-gpu-isnt-enough-serving-glm-5-3-across-two-nvidia-dgx-stations-with-vllm

24. NVIDIA: How AI Is Helping Care Teams Get Patients the Right Care, Sooner

From pediatric research to smart hospitals, AI is helping care teams spend less time on routine tasks and more time with patients.

Evidence: Health systems and startups are putting it to work across healthcare, from matching patients to clinical trials to supporting radiologists, hospital teams and patients at home.

Impact: Teams can evaluate the documented NVIDIA workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blogs.nvidia.com · https://blogs.nvidia.com/blog/how-ai-is-helping-care-teams/

25. LangChain Raises $300M Series C at $3B Valuation

LangChain Raises $300M Series C at $3B Valuation.

Evidence: The Reference discovery release records $300M for LangChain.

Impact: Teams can evaluate the documented LangChain workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: www.langchain.com · https://www.langchain.com/blog/series-c

26. Anthropic CEO Dario Amodei aims to 'underpromise and overdeliver' as IPO valuation drops below $2T hopes

Anthropic CEO Dario Amodei aims to 'underpromise and overdeliver' as IPO valuation drops below $2T hopes.

Evidence: The Reference discovery page documents the Yahoo update.

Impact: Teams can evaluate the documented Yahoo workflow before wider rollout.

Watch next: watch availability, limits, and real usage for Yahoo.
