Two-series written report and verified spoken scripts

Daily report

AI Daily

6 source-linked editorial stories.

1. langchain, from langchain-ai, gained 55 GitHub stars in a day

LangChain is a framework for building agents and LLM-powered applications.

Evidence: Check out Deep Agents - a higher-level package built on LangChain for agents that have built-in capabilities for common usage patterns such as planning, subagents, file system usage, and more.

Impact: Teams can evaluate the documented langchain-ai workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

2. Create videos with code

Remotion came out in 2021, way before agents were the hype.

Evidence: The Remotion Documentation page documents the Remotion update.

Impact: Teams can evaluate the documented Remotion workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: www.remotion.dev · https://www.remotion.dev/docs/create-videos-with-code

3. Agent Skills

Remotion maintains a list of Agent Skills that define best practices for working in Remotion projects.

Evidence: These skills are useful for AI agents like Claude Code, Codex, Cursor, Kimi Code and OpenCode.

Impact: Teams can evaluate the documented Remotion workflow before wider rollout.

Watch next: Watch the Remotion release for patch notes and rollout issues.

Source: www.remotion.dev · https://www.remotion.dev/docs/ai/skills

4. LangChain: Goal Engineering

The future of agents is them taking on open ended goals and driving towards completion of those goals.

Evidence: The LangChain Blog page documents the LangChain update.

Impact: Teams can evaluate the documented LangChain workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: www.langchain.com · https://www.langchain.com/blog/goal-engineering

5. signoz, from SigNoz, gained 20 GitHub stars in a day

SigNoz is an open-source, OpenTelemetry-native observability platform for your team and their AI agents.

Evidence: Get logs, metrics, and traces in one tool with features like APM, distributed tracing, log management, infra monitoring, etc.

Impact: Teams can evaluate the documented SigNoz workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.com · https://github.com/SigNoz/signoz

6. lago, from getlago, gained 20 GitHub stars in a day

Open Source Metering and Usage Based Billing API Consumption tracking, Subscription management, Pricing iterations, Payment orchestration & Revenue analytics.

Evidence: The repository has 10,862 stars and is written mainly in Go.

Impact: Teams can evaluate the documented getlago workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Finance Daily

2 source-linked editorial stories.

1. Bitcoin down 4.2% at $64,506 on CoinGecko data

Bitcoin down 4.2% at $64,506 on CoinGecko data.

Evidence: Bitcoin started the 24-hour window at $67,327, according to CoinGecko.

Impact: CoinGecko price data show Bitcoin at $64,506, down 4.2% from $67,327 over the past 24 hours.

Limits: Bitcoin down 4.2% at $64,506: firmer rates or sticky inflation could reverse the liquidity and equity-risk read

Watch next: Watch whether Bitcoin and Ether extend or reverse these moves as Wall Street opens, and how the dollar and Treasury yields respond.

Source: api.coingecko.com · https://api.coingecko.com/api/v3/coins/bitcoin/market_chart/range?vs_currency=usd&from=1794639600&to=1794725999

2. Ether down 5.4% at $1,801 on CoinGecko data

Ether down 5.4% at $1,801 on CoinGecko data.

Evidence: Ether started the 24-hour window at $1,904, according to CoinGecko.

Impact: CoinGecko price data show Ether at $1,801, down 5.4% from $1,904 over the past 24 hours.

Limits: Ether down 5.4% at $1,801: firmer rates or sticky inflation could reverse the liquidity and equity-risk read
