AI Daily

21 source-linked editorial stories.

1. AWS: Amazon OpenSearch Memory is now generally available

Today, AWS announced the general availability of Amazon OpenSearch Memory, a new serverless capability in Amazon OpenSearch Service for adding persistent memory to AI agents.

Evidence: OpenSearch Memory stores agent interactions as searchable events, derives useful memories, and retrieves relevant context across sessions, so agents can recall prior decisions, earlier interactions, and user preferences without replaying the full conversation history to the model.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: Watch AWS What's New for recovery confirmation and further AWS incidents.

3. Anthropic: Claude Meetings auto-join limited on the Team plan

Team customers can again add Claude to new calls manually, and Auto-join is being restored gradually for Team customers.

Evidence: Posted Nov 17, 2026 - 23:39 UTC Identified Claude Meetings (beta) saw higher than expected demand today, and Claude was unable to join many calls.

Impact: Teams can evaluate the documented Anthropic workflow before wider rollout.

Watch next: Watch Anthropic Status for recovery confirmation and further Anthropic incidents.

Source: status.claude.com · https://status.claude.com/incidents/b5cq662qf2wm

4. Customize GitHub Copilot for your team

Team customizations are generally available for organization teams.

Evidence: Team maintainers and organization owners can select approved Agent Plugins as team defaults.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.blog · https://github.blog/changelog/2026-11-18-customize-github-copilot-for-your-team

5. Wait for pull request events with GitHub CLI

GitHub CLI now supports GitHub Event Streams.

Evidence: With gh v2.105.0, you and your agents can wait for a pull request to change with a single command instead of polling it in a loop.

Impact: Teams can evaluate the documented GitHub workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: github.blog · https://github.blog/changelog/2026-11-18-wait-for-pull-request-events-with-github-cli

6. Connect Supabase, Box, Calendly, and more to Copilot

You can now connect eight more services to Copilot using GitHub-verified MCP servers, or connectors, available in public preview.

Evidence: They join more than 25 services you can already connect, like Slack, Figma, and Sentry.

Impact: Teams can evaluate the documented GitHub Copilot workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.blog · https://github.blog/changelog/2026-11-18-connect-supabase-box-calendly-and-more-to-copilot

7. Browser Automation Tool in Microsoft Foundry : Ignite'26 Announcements

The Browser Automation tool in Foundry Agent Service, powered by Azure Playwright Workspaces, is now generally available.

Evidence: The Microsoft Foundry Blog page documents the Microsoft update.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: devblogs.microsoft.com · https://devblogs.microsoft.com/foundry/browser-automation-tool-ignite/

8. Build once, reuse across your agent fleet: Tools and Toolboxes in Foundry

Tool search in Toolbox lets agents discover the tools they need on demand, so the shared catalog can grow without filling the context window with every tool definition.

Evidence: The Microsoft Foundry Blog release records rollout for Microsoft.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: Watch the Microsoft release for patch notes and rollout issues.

Source: devblogs.microsoft.com · https://devblogs.microsoft.com/foundry/build-once-reuse-across-your-agent-fleet-tools-and-toolboxes-in-foundry

9. Microsoft: Hosted agents in Foundry Agent Service at Ignite 2026: from pilot to production inside your enterprise boundaries

At Microsoft Ignite 2026, we're announcing a solution to each of these challenges for hosted agents in Foundry Agent Service.

Evidence: The egress and private CA updates apply to managed hosted agents, the ones Foundry runs for you; BYO-AKS support will be documented separately.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: Watch the Microsoft release for patch notes and rollout issues.

10. Securing Agentic AI with Docker AI Governance

It can execute code, access files, connect to services, and call external tools.

Evidence: That creates a new security question for enterprises: how do you give an agent enough freedom to be useful without giving it more access than it actually needs?

Impact: Teams can evaluate the documented Docker workflow before wider rollout.

Watch next: Watch the Docker release for patch notes and rollout issues.

Source: www.docker.com · https://www.docker.com/blog/agentic-ai-security-docker-governance

11. OpenAI: Phew, ChatGPT for Accounting is now available.

Phew, ChatGPT for Accounting is now available.

Evidence: Its new Accounting plugin and partner plugins help you close your books with less manual work for tasks like: - Month-end reports - Bank reconciliation - Data entry - Audit prep. Put ChatGPT to work with tools like @QuickBooks, Posted 2026-11-18.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

AI Daily

This is AI Daily. Today: A W S, Amazon OpenSearch Memory is now generally available; and OpenAI, Phew, ChatGPT for Accounting is now available.

Today, A W S announced the general availability of Amazon OpenSearch Memory, a new serverless capability in Amazon OpenSearch Service for adding persistent memory to AI agents. OpenSearch Memory stores agent interactions as searchable events, derives useful memories, and retrieves relevant context across sessions, so agents can recall prior decisions, earlier interactions, and user preferences without replaying the full conversation history to the model.

Anthropic has priced its IPO at $83 per share, with trading expected to begin on Nasdaq tomorrow. Legal disclaimer: A registration statement relating to the Class A common stock was declared effective by the Securities and Exchange Commission on November 18,.

Team customers can again add Claude to new calls manually, and Auto-join is being restored gradually for Team customers. Posted Nov 17 , 2026 - 23:39 UTC Identified Claude Meetings (beta) saw higher than expected demand today, and Claude was unable to join many calls.

You can now share the GitHub Copilot plugins your team relies on without asking every member to repeat the same setup. Team customizations are generally available for organization teams. Team maintainers and organization owners can select approved Agent Plugins as team defaults.

GitHub CLI now supports GitHub Event Streams. With gh v2.105.0, you and your agents can wait for a pull request to change with a single command instead of polling it in a loop. Run gh event listen with a pull request URL and the events you care about, such as a submitted review.

You can now connect eight more services to Copilot using GitHub-verified MCP servers, or connectors, available in public preview. They join more than 25 services you can already connect, like Slack, Figma, and Sentry. To see the full list, open Customize in the Copilot app or browse the Copilot customization page.

Browser Automation Tool in Microsoft Foundry : Ignite'26 Announcements. The Browser Automation tool in Foundry Agent Service, powered by Azure Playwright Workspaces, is now generally available.

Tool search in Toolbox lets agents discover the tools they need on demand, so the shared catalog can grow without filling the context window with every tool definition.

At Microsoft Ignite 2026, we’re announcing a solution to each of these challenges for hosted agents in Foundry Agent Service. The egress and private CA updates apply to managed hosted agents, the ones Foundry runs for you; BYO-AKS support will be documented separately.

Securing Agentic AI with Docker AI Governance. It can execute code, access files, connect to services, and call external tools. That creates a new security question for enterprises: how do you give an agent enough freedom to be useful without giving it more access than it actually needs?

Phew, ChatGPT for Accounting is now available. Its new Accounting plugin and partner plugins help you close your books with less manual work for tasks like: - Month-end reports - Bank reconciliation - Data entry - Audit prep. Put ChatGPT to work with tools like @QuickBooks,.

From March to October, estimated success rose from 23% to 46% for tasks estimated to require two to four hours of human work, and rose from 13% to 35% for tasks estimated to require four to eight hours. For example, in a task-level breakdown, the autonomous agent success rate was 79% for monitoring training runs, 35% for launching training runs, and 25% for writing code for inference and serving stacks. Overall, uplift is jagged, and humans remain a core part of the AI research loop.

Costs API data is delayed.

Not every workflow requires an immediate response. For single- or multi-turn workflows that can wait, save up to 40% per token than Standard on GPT 6 point 2 Astra or GPT 6 point 2 Sol. In Responses API background mode, choose a 2h or 8h target for the first response.

The default permission profile disables network access. When a command requests access, Codex may prompt the user directly or route the request to auto-review. If your build regularly downloads from a package registry, you can allow the registry’s domain in a permission profile.

Dictation in ChatGPT is getting faster and more reliable. With Live Dictation, your speech turns into text as you talk, so you spend less time waiting for your message to finish transcribing.

The Gemini app is available on lower-memory Android devices. For hundreds of millions of people globally, a lower-memory Android device is their everyday connection to the internet, education, and business. Until recently, hardware limits meant those phones only had basic voice commands.

Google for Mexico: Technology impact that goes beyond business.
