AI Daily

24 source-linked editorial stories.

1. OpenAI: GPT-Live-1.1 is now available in the API.

GPT-Live-1.1 is now available in the API.

Evidence: It speaks with more natural and consistent accents across languages, supports lower idle costs with a new standby option, and completes tasks even more reliably.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: x.com · https://x.com/OpenAIDevs/status/2123506733524136446

Source: developers.openai.com · https://developers.openai.com/api/docs/models/gpt-live-1.1

2. OpenAI: Health is now available in more of the places you use ChatGPT, including the desktop app, dots, Sites, and Android.

Health is now available in more of the places you use ChatGPT, including the desktop app, dots, Sites, and Android.

Evidence: With your connected health information you can: - Analyze your sleep and workout patterns on desktop, like how you sleep after morning or evening workouts.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/ChatGPT/status/2123545961381216325

3. Tibo Sottiaux (OpenAI): Team is crazy enough to think they can succeed at improving the experience used by 1.2B users in place.

Tibo Sottiaux (OpenAI): Team is crazy enough to think they can succeed at improving the experience used by 1.2B users in place.

Evidence: The X @thsottiaux release records 1.2B for OpenAI.

Impact: Teams can evaluate the documented OpenAI workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/thsottiaux/status/2123612889416339762

4. Introducing Tool Retrieval in the Gemini API

Introducing Tool Retrieval in the Gemini API.

Evidence: The blog.google release records preview for Google.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: blog.google · https://blog.google/innovation-and-ai/technology/developers-tools/gemini-api-tool-retrieval

Source: x.com · https://x.com/googledevs/status/2123493028732207296

5. Google: Native SSH support is now available in the Antigravity desktop app.

Native SSH support is now available in the Antigravity desktop app.

Evidence: In addition to Remote Control, Antigravity now can connect to remote servers using SSH from the Antigravity app.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: x.com · https://x.com/antigravity/status/2123476398601908551

Source: antigravity.google · https://antigravity.google/docs/ssh

6. Genie 4 is now available on the Gemini API.

Following yesterday's Genie 4 launch, Genie 4 is now available for developers through the Gemini API (via the Interactions API) and Google AI Studio.

Evidence: Starting from a text prompt, a reference image, or both, developers can experiment with generating continuous 720p worlds at 24fps with synchronized native audio - from ambient soundscapes and sound effects to character dialogue.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: blog.google · https://blog.google/innovation-and-ai/technology/developers-tools/genie-4-in-gemini-api

7. Let Gemini tackle repetitive chores on your Mac

Google is introducing computer use in the Gemini app for Mac to help you automate repetitive tasks across your local files, desktop apps, and the web.

Evidence: You can describe complex workflows, and Gemini will handle the clicking, typing, and form entries while you maintain control.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/innovation-and-ai/products/gemini-app/computer-use-mac

8. Google is partnering with Blue Origin on its first heavy-lift Project Suncatcher launch.

Google is partnering with Blue Origin on its first heavy-lift Project Suncatcher launch.

Evidence: The Google Blog All Topics page documents the Google update.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/innovation-and-ai/models-and-research/google-research/blue-origin-project-suncatcher-partnership

9. ICYMI: Transfer your history from other AI apps into Gemini.

ICYMI: Transfer your history from other AI apps into Gemini.

Evidence: The blog.google page documents the Google update.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/innovation-and-ai/products/gemini-app/switch-ai-assistants-transfer-history

10. Walter Isaacson on curiosity and creativity in the AI age.

What do Leonardo da Vinci, Benjamin Franklin, and Ada Lovelace have to teach us about creativity in the age of AI?

Evidence: On its newest episode of Dialogues on Technology and Society, Kent Walker sits down with biographer and historian Walter Isaacson to talk about why history's biggest breakthroughs have always been a team sport.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/innovation-and-ai/technology/ai/dialogues-walter-isaacson/

11. Small businesses, big results: How teams scale with AI

These tools allow you to draft documents, organize data, and respond to inquiries faster so you can focus on growing your brand.

Evidence: Visit its Google Workspace AI resources page to explore these features and access training courses that help you get started with AI today.

Impact: Teams can evaluate the documented Google workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: blog.google · https://blog.google/products-and-platforms/products/workspace/google-workspace-gemini-small-business-stories

12. AWS: Amazon Bedrock AgentCore harness adds Strands harness defaults, built-in tools, and lifecycle hooks

We are upgrading Amazon Bedrock AgentCore harness to use Strands harness, our open-source agent harness, released earlier this year, available under an Apache 2.0 license.

Evidence: AgentCore harness also introduces lifecycle hooks, so you can apply your own deterministic checks and notifications at defined points in the agent loop.

Impact: Teams can evaluate the documented AWS workflow before wider rollout.

Watch next: Watch the AWS release for patch notes and rollout issues.

Source: aws.amazon.com · https://aws.amazon.com/blogs/machine-learning/amazon-bedrock-agentcore-harness-adds-strands-harness-defaults-built-in-tools-and-lifecycle-hooks/

13. Microsoft unveils 7 AI models for coding, image editing, voice and more

Microsoft unveils 7 AI models for coding, image editing, voice and more.

Evidence: The source records 5.5 / 1.1.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: microsoft.ai · https://microsoft.ai/news/microsoft-ignite-2026/

14. Hybrid intelligence on the Web: Introducing Aion Instruct and Prompt API in Microsoft Edge

To make on-device inference more broadly available, we're introducing three updates today: General availability of Aion Instruct as an open-weights model on Hugging Face, and as Microsoft Edge's built-in small language model.

Evidence: An origin trial for the Prompt API, so you can use the Prompt API and Aion Instruct on your live site today.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: blogs.windows.com · https://blogs.windows.com/msedgedev/2026/11/19/hybrid-intelligence-on-the-web-introducing-aion-instruct-and-prompt-api-in-microsoft-edge/

15. Build trusted autonomous agents for your team with Microsoft Foundry

Build trusted autonomous agents for your team with Microsoft Foundry.

Evidence: The Microsoft Foundry Blog page documents the Microsoft update.

Impact: Teams can evaluate the documented Microsoft workflow before wider rollout.

Watch next: Watch the Microsoft release for patch notes and rollout issues.

Source: devblogs.microsoft.com · https://devblogs.microsoft.com/foundry/build-trusted-autonomous-agents-for-your-team-with-microsoft-foundry/

16. Deferred tool loading: Make your agent 62.5% cheaper without changing your model or harness

Deferred tool loading: Make your agent 62.5% cheaper without changing your model or harness.

Evidence: The Baseten Blog release records 62.5 for Baseten.

Impact: Teams can evaluate the documented Baseten workflow before wider rollout.

Watch next: watch license, setup path, and benchmark.

Source: www.baseten.co · https://www.baseten.co/blog/deferred-tool-loading-without-changing-model-harness

17. LangSmith Tool Gateway: Secure, governed tool use for agents

Today, we're launching LangSmith Tool Gateway in Public Beta, on the LangSmith Agent Platform.

Evidence: Tool Gateway is a managed tool layer that handles credentials, identity, and access for every agent tool call, making it simple to govern the actions your agents take.

Impact: That makes them much more useful, but it also means teams need to control which tools each agent can call and whose identity it acts with, and keep a record of every action it takes.

Watch next: Watch the LangChain release for patch notes and rollout issues.

Source: www.langchain.com · https://www.langchain.com/blog/langsmith-tool-gateway

Source: www.langchain.com · https://www.langchain.com/blog/langsmith-alerts

18. LangChain: Why agent governance starts with observability

They also look at the full trajectory of each run, since the same agent can take different paths and call different tools on the same input.

Evidence: Both strategies depend on agent observability, the ability to record and analyze every step an agent takes.

Impact: Teams can evaluate the documented LangChain workflow before wider rollout.

Watch next: Watch the LangChain release for patch notes and rollout issues.

Source: www.langchain.com · https://www.langchain.com/blog/agent-governance-observability

19. Meet the New Docker: Built to Run on Trust

That one seemingly simple yet infinitely complex question is why we're here today, introducing you to a new Docker.

Evidence: A new Docker, but a familiar story.

Impact: Teams can evaluate the documented Docker workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: www.docker.com · https://www.docker.com/blog/meet-the-new-docker-built-to-run-on-trust

20. Anthropic Python SDK releases 2.11.0

The pypi registry records Anthropic Python SDK version 2.11.0.

Evidence: Review the linked changelog for breaking changes, model access, and developer impact.

Impact: Teams can evaluate the documented Anthropic workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: pypi.org · https://pypi.org/project/anthropic/2.11.0/

21. Anthropic TypeScript SDK releases 1.11.0

Review the linked changelog for breaking changes, model access, and developer impact.

Evidence: The NPM Anthropic TypeScript SDK release records 1.11.0 for Anthropic.

Impact: Teams can evaluate the documented Anthropic workflow before wider rollout.

Watch next: watch docs, endpoint access, and developer limits.

Source: www.npmjs.com · https://www.npmjs.com/package/@anthropic-ai/sdk/v/1.11.0

22. SoK: Assessing the Evolution of LLM Capability in Software Vulnerability Research

LLM based agents are becoming increasingly capable at discovering, validating and patching vulnerabilities in real software, and vendors and researchers report that this is already changing how vulnerabilities are found and fixed.

Evidence: The arXiv Coding-Agent Research page documents the arXiv update.

Impact: Teams can evaluate the documented arXiv workflow before wider rollout.

Watch next: watch security notes, rollout controls.

Source: arxiv.org · https://arxiv.org/abs/2611.26601v1

23. pgvector, from pgvector, gained 11 GitHub stars in a day

There are also instructions for GitHub Actions.

Evidence: The GitHub: pgvector/pgvector release records v0.8.7 for pgvector.

Impact: Teams can evaluate the documented pgvector workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.com · https://github.com/pgvector/pgvector

Source: github.com · https://github.com/trending?since=daily&spoken_language_code=en

24. posthog, from PostHog, gained 62 GitHub stars in a day

Steer it all from Slack, web, desktop, or the MCP.

Evidence: The repository has 40,981 stars and is written mainly in Python.

Impact: Teams can evaluate the documented PostHog workflow before wider rollout.

Watch next: watch availability, limits, and real usage.

Source: github.com · https://github.com/PostHog/posthog

Source: github.com · https://github.com/trending?since=daily&spoken_language_code=en

UNVERIFIED supplemental report

Non-official information. Unverified report. The Information reports: Anthropic Is Pushing New Products, and Big Discounts, to Justify Its Huge Valuation. The claim from The Information is not independently confirmed. Confirmation to watch for the The Information report: A first-party statement from Anthropic that confirms it.
